

ALEXANDRIA FIRE DEPARTMENT *Organizational Restructure*

Effective June 12, 2021, the City of Alexandria Fire Department will implement an organizational restructure. It will include Specialty Team relocations, apparatus relocations, **Advanced Life Support (ALS)** unit upgrades, **Battalion Management Teams (BMT)**, the addition of **Emergency Medical Services (EMS)** lieutenants and other quality improvements.

ALS-Suppression Units will be minimally staffed with (1) ALS provider on several suppression units. Upgrading Engine 201 and Truck 208 to ALS units improves ALS coverage in Old Town and in the Landmark area, to correspond with the higher call volume for medical service in those areas. The AFD ALS-Suppression Units are:

- » Engine 201
- » Engine 205
- » Engine 206
- » Engine 208
- » Truck 208

Special Operations Units are realigned to improve response preparedness, service models and resource integration.

- » Station 204 (Marine) – 900 Second St.
- » Station 209 (Inland Water, Technical Rescue) – 2800 Mainline Blvd.
- » Station 210 (Hazardous Materials) – 5255 Eisenhower Ave.
- » Station 203 will house Truck 203 – 2801 Cameron Mills Road

BMTs will include a Battalion Chief and an EMS Captain or Suppression Captain for all three shifts. The EMS Captain will be included in the BMT on the East End, and a Suppression Captain will be in the BMT on the West End.

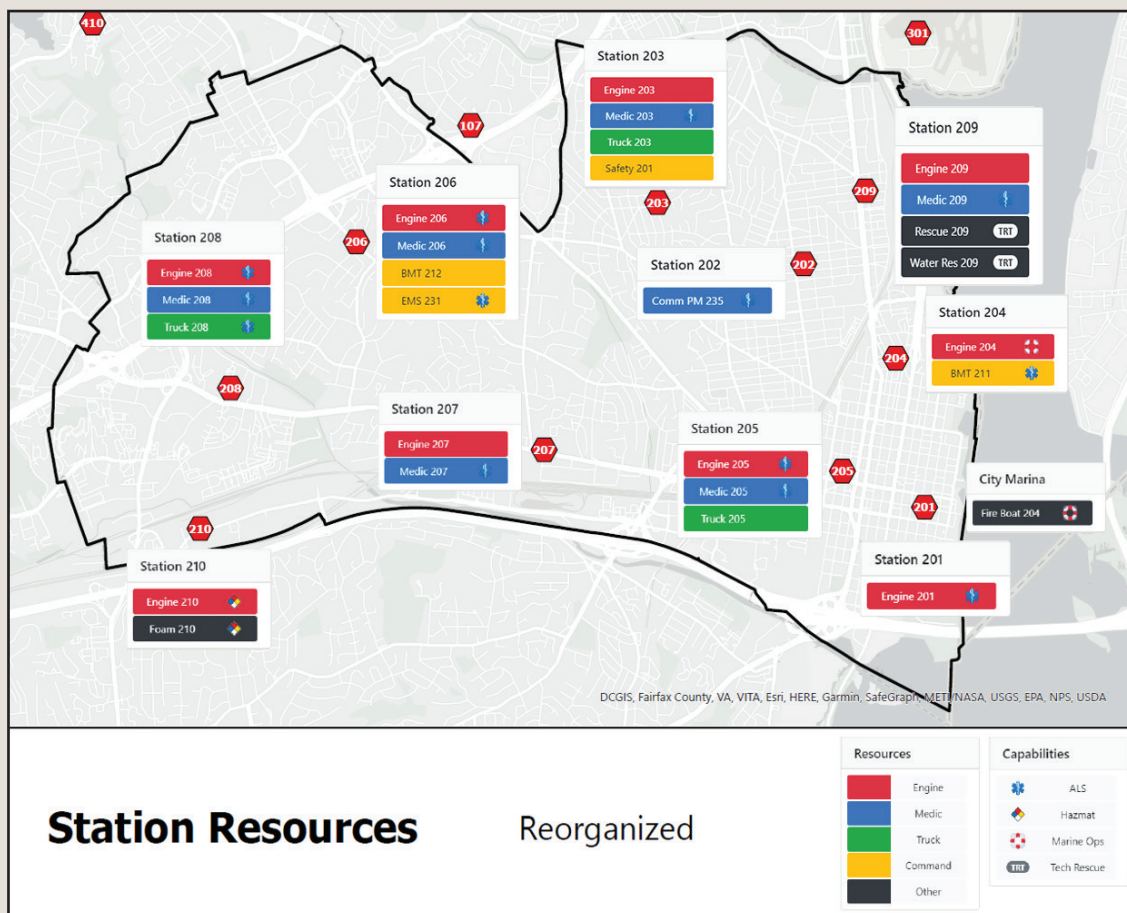

- » BMT 211 (East End) – Battalion Chief 211 and an EMS Captain
- » BMT 212 (West End) – Battalion Chief 212 and a Suppression Captain

EMS Lieutenants are promoted ALS officers. They will be allocated to units throughout the city on each shift to provide a higher quality of care.

- » Station 206 – EMS Lieutenant Supervisor Vehicle designated as EMS 231
- » Station 205 – EMS Lieutenant on M205
- » Station 206 – EMS Lieutenant on M206
- » Station 208 – EMS Lieutenant on M208

Captains will be assigned to each station. This will leverage the experience of more tenured staff to improve daily station management, proactively address personnel and facility issues and improve the professional development of newly promoted first line supervisors.
