APPENDIX A: SCOPE OF WORK

Research Questions

The John Carlyle Square archeological site (44AX181) appears on the basis of Phase I Field Investigation to be eligible for listing in the National Register of Historic Places under Criterion D for its potential to provide data important in Alexandria history. The initial proposal is to address questions related to industrial archeology and the technology of historic glass manufacture. These questions include:

- What does the entire site look like, and what are the relationships of portions of the factory to each other? What is the industrial archeology of the site?
- What were the operations of the factory and the process of glass manufacture?
- What were other occupations and uses of the site, and how are they distinguished from the factory site?
- How were the gas producers, furnaces, oven and lehrs connected to each other?
- What was the source of energy for each of the features used in the bottle making process?
- Are there other features that do not appear on the Sandborn map?
- What types of bottles were manufactured at the site and what were they used for?
- What is the nature and chronology of the "midden" in the south portion of the site and how is it related functionally and temporally to the factory?

Field Excavation—Approach

The two goals of the field excavation are: 1) to horizontally expose and record the archeological remains of the factory and associated components using a wide scraper blade to remove the fill in order to see the whole site and understand and record the relationship of portions of the factory to each other, and 2) to investigate and record individual features of the site. Decisions about which features to investigate will be determined in consultation with *Alexandria Archaeology*, and will be based, in part, on the results of information collected during the horizontal scraping. It is anticipated that some of the following features may require further study:

- **The melting furnaces.** The primary purposes of this aspect of excavation will be to identify the chambers and walkways, and investigate connections between the two melting furnaces and to identify remains within the furnaces.
- **The oven and the lehrs.** The questions to be answered in this area include: the function of this portion of the site (was it a secondary processing area where glass was tinted?) and the relationship of the components to each other (does a flue system connect the oven to the lehrs?).
- **The midden area west of the brick chimney in the south portion of the site.** Research questions to be addressed include: was this area associated in time and function with the glass factory? Was it a residential area predating the glass factory? Is it possible to distinguish between artifacts from the midden and other areas of the site? Is it related to the factory, the nearby rail line or another site function? Why is it so deep? Do the layers appear to be the

depositional consequence of removal of the gas producers or were they the result of trash dumping during the factory period? The railroad period? What are the boundaries of the midden?

- *Gas producers.* What were they? How did they function? Were they inside or outside the factory?
- *The south wall of the factory.* Can the south wall be identified or has it previously been destroyed? Does the south wall include the gas producers or are they buried outside and behind the factory?
- *Isolated walls.* A number of isolated walls have been uncovered that appear to be unrelated to internal features of the factory. Are these internal walls supports to the overall factory structure? Are they functional dividers?
- *The brick chimney.* Once the overburden has been removed, more information will be available to determine whether the chimney has potential to reveal further data that should be recovered. Research questions may consider what it was connected to and what it was used for.

Procedures

- **Mechanical excavation** will be conducted using a backhoe with a wide bucket or similar equipment (e.g. a grade-all) to take the project area down horizontally to an elevation at which the surfaces of structural features are exposed. According to the information gathered during Phase I study, this will require the removal of two or more feet of fill to a dark black rubble horizon that presumably is related to the 1914 fire destruction of the bottle factory.
- **Documentation** at the conclusion of the horizontal excavation will include using wide scale photography (and, if possible, a cherry picker supplied by the City of Alexandria) and map verification and correction. All features will be recorded through measured drawings and color transparency photographs.
- **Consultation with Alexandria Archaeology** to determine: which factory features warrant further investigation (see Approach, above); to establish areas of the site that need stratigraphic examination; and to determine appropriate methods for vertical excavation of selected features.
- **Vertical excavation** of units in specific sections of the site that are selected on the basis of information collected during horizontal excavation to have potential to provide important additional data. Methodology will incorporate hand and mechanical excavation as appropriate.

We will need you to supply:

- A backhoe and operator (as you have during Phase I);
- Continued marking and protection of open excavation units;
- A pump that will drain the excavation units and trenches to make excavation and stratigraphic recordation possible;
- A surveyor to map the site at the conclusion of the project.

Analysis

Artifacts recovered from the excavation will be taken to the Dames & Moore Laboratory in Bethesda, Maryland. They will be washed, labeled and catalogued according to the requirements of the *City of Alexandria Archaeological Standards*. Glass, the primary material recovered from the site, will be washed, labeled, catalogued and bagged. Metal will be dry brushed. All artifacts will be prepared for storage using stable, acid-free materials, and will be delivered to *Alexandria Archaeology*.

The materials that are being recovered from site 44AX181 appear to present a unique assemblage, providing an array of architectural and mechanical features and artifacts that relate to a specific type of manufacture within a well-defined time period in a specific location. Recovered artifacts represent stages of the glass manufacture (e.g. wasters, finished bottles of various types, and equipment parts), providing information about the manufacture process.

Background research on historic glass manufacture has been ongoing throughout the excavation so that decisions can be made in the field that are appropriate to the resource. The analysis after excavation will continue in that light.

Background archival research will include primary resources, (such as period newspapers, censuses, city and business directories and other such documents, maps, photographs, and reports), as well as secondary resources such as the histories of the West End neighborhood and other materials compiled by or for *Alexandria Archaeology*. A historic context will be developed that will shed light on relevant questions relating to the glass making industry in Alexandria. The focus of analysis will be on understanding the operations of the factory and the process of glass manufacture, what was made, how was it used, distribution and trade.

Report

A report of excavations and analysis will be completed to meet the *Report Specifications* of the *City of Alexandria Archaeological Standards*. It will integrate historic documentation and

archeological information in an effort to develop a historic context, and learn and convey as complete as possible a picture of historic glass manufacture in Alexandria.

Personnel

I will continue to function as Project Manager, Phillip Hill will be Principal Investigator, and Cynthia Pfanstiehl will be Field Director and will have primary responsibility for background research and report preparation. We will use field technicians and laboratory technicians who meet the standards of Alexandria Archaeology and who are approved by them in advance of their participation in the project.

Level of Effort

The cost estimate is based on an estimate of 800 hours in the field investigation, or 6 to 7 people each day for 15 days (December 1 through December 19, potentially including December 22 and 23 to compensate for weather) plus a small management component. Artifact processing and laboratory analysis is estimated at 400 hours, and background research, context development, and report preparation at 240 hours.

Please call me at (301) 652-2215 if you have any questions. I will begin work on the second modification letter, and hope to fax it to you by the end of the day. I look forward to hearing from you,

Sincerely,

DAMES & MOORE

Archaeological Scope of Work for 1820-1828 Duke Street, Block D, Carlyle Project Alexandria, Virginia

October 21, 1997

This scope of work concerns an archaeological investigation, financed by Norfolk Southern Corporation, for the property located at 1820, 1822, 1824, 1826 and 1828 Duke Street, Alexandria, Virginia. This property is historically significant in being the site of the early 20-century Virginia Glass Company Bottle Factory. Four such factories are known to have operated in Alexandria, but none has been the subject of scientific archaeological investigation. Although extensive archaeological investigations were conducted in the Carlyle Project area by Tellus Consultants, Inc., from 1990 to 1993, and by Engineering Science, Inc. in 1993 and 1994, this area in Block D was not investigated because of the standing Station Shops building. In 1993, an agreement was made between Norfolk Southern Corporation, owner of the Carlyle property, and the City of Alexandria for an archaeological investigation to be conducted upon the demolition of the Station Shops on Duke Street. This building will be demolished by October 31, 1997. This scope of work concerns only the initial testing phase of the archaeological investigation and if significant cultural resources are discovered, additional field work will be necessary.

All aspects of this research will conform to the City of Alexandria Archaeological Standards and the Secretary of the Interior's Standards and Guidelines for Archaeology and Historic Preservation. The Alexandria Standards are considered an integral part of this scope of work. Furthermore, it is a requirement that the archaeological contractor be able to field and equip an appropriate number of properly trained field supervisors, technicians and lab personnel to accomplish this work in the time required. Alexandria Archaeology must receive CVs and approve all personnel, before the field work begins. The field director must have knowledge and experience with historical sites and features, and be able to readily identify and date 19th/early 20th century artifacts. The field director must be on the site at least 90% of the time and on a daily basis. The proposal should include an itemized budget, with individual personnel costs (i.e., X number of crew for X number of hours for X number of days, by task--excavation, lab, drafting, etc.). The following tasks shall be accomplished in this order:

1. The principal investigator and field director meet with Alexandria Archaeology to review

PAGE 1 OF 2

documentary information and Ground Impact Maps, as well as to discuss the research strategy.

2. Obtain and complete City Supplemental approval forms, Archaeological Preservation Certification form and any other city permits. Contact Miss Utility to clear the property for excavation.

3. Using a backhoe and standard archaeological methods, excavate and record trenches and test units. Recording includes accurate placement of trenches, features, units, etc. on a large-scale base map which includes visible landmarks; labeled photographic slides of trench locations, wall profiles, units, and all features; labeled stratigraphic column trench profiles (minimally two for each trench). This includes 5 mandatory test trenches (see map for locations) totaling 500 linear feet, with 100 linear feet of additional discretionary test trenches. The latter 100 linear feet should be costed out as a separate unit that will not be charged for if it is not dug. An effort must be made to determine the dimensions and identity of structures and features in order to determine if further work is required and to have an idea of the scale of this work. The discretionary trenching should be used for this purpose. If intact bottle factory or 18th- or 19th- century ground (or floor) surfaces, or features are identified, 4 mandatory 3 x 3 foot square units will be dug by hand. Additional units may be determined to be necessary by the field director, but these should be budgeted on a per unit basis.

4. If artifact assemblages from significant contexts are recovered, register the site(s) with the Department of Historic Resources, Commonwealth of Virginia. Send copies of the registration form(s) to Alexandria Archaeology. The site number must appear on all field forms, notes, artifact bags and boxes, etc.

5. Process, analyze and package the artifacts. Draft an Evaluation Report that includes a presentation of the documentary and archaeological research conducted, evaluation of site significance and a Resource Management Plan recommending further archaeological investigation if warranted. Show findings and preservation treatments/additional archaeological units on small-scale map. Submit the report to the City Archaeologist for review and revise as necessary producing a final report. Submit four copies (one unbound) of the final report to Alexandria Archaeology where this information will be made available to the public.

6. Along with the final report, all archaeological investigation records--i.e., field notes, forms, slides, photographs and negatives, maps, etc. must be delivered to Alexandria Archaeology before this project will be considered completed. All artifacts may be donated to Alexandria Archaeology for study and curation or may be otherwise stored in a manner requisite with professional archaeological curation standards.

7. If the City Archaeologist finds that the research results warrant it, make a presentation of the results to the Alexandria Archaeological Commission and a similar presentation to the public.

NOTE: This scope of work is in effect for a period of six months and is then subject to review and revision by Alexandria Archaeology.

Electrical Catalog

Cat #	CN	Trench/ Block	Unit	Feature #	Level/ Scrape	Area Description	Category	Type	Description (other than bottle glass)	Count
0282	003	T-1				Artifacts from Trench 1	electrical	insulator	round, hole in center, diam. 1.125", white glaze	1
0680	110			F-06	S-2	Artifacts from Furnace 2, collected during scrape 2	electrical	fuse	cone shaped, 1" tall	1
0681	073			F-29	S-1	Artifacts from Gas Producers, south of factory	electrical	insulator	porcelain, rectangular	1
0684	084			F-05	S-2	New area south of T-2	electrical	insulator	porcelain, type featured in cat.# 663, cylindrical, broken in half, "PAT APR 2..."	1
0685	087			F-29	S-2	Artifacts from Gas Producers area	electrical	insulator	porcelain, part of a switch, 2" diameter, broken in half, "2 A1 25V"	1
0687	085			F-35	S-2	Artifacts from walk between furnaces	electrical	insulator	porcelain, type featured in cat.# 683, cylindrical, broken in half, "PAT APR 27..."	1
0694	086				S-2	Artifacts from south of Furnace 1	electrical	fuse	1.25" tall, 1.25" diameter base, top comes off, base says "ECONOMY FUSE & MFG. CO." "Chicago, USA"	1
0791	075			F-05	S-1	Artifacts from Furnace 1, scrape 1	electrical	insulator	porcelain, "PEIRCE 1603" diameter of ends 2", height 2", hole through center	1
0890	097			F-37	S-2	Square area NW of Gas Producers	electrical	insulator	bright teal, internal thread, 3" diameter, beads along base. "HEMINGRAY-19...USA"	1
0993	059			F-06	S-1	Scrape 1 Artifacts from Furnace 2	electrical	insulator	bright teal w/internal thread	1
0994	097			F-37	S-2	Square area NW of Gas Producers	electrical	insulator	porcelain, w/white glaze, hole through center	1
1067	097			F-37	S-2	Square area NW of Gas Producers	electrical	insulator	large, porcelain/stoneware insulator w/black glaze, fragment is 3" x 4"	1

Factory Tools Catalog

Cat #	CN	Trench/ Block	Unit	Feature #	Level/ Scrape	Area Description	Category	Type	Description (other than bottle glass)	Count
0300	073			F-29	S-1	Artifacts from Gas Producers, south of factory	factory tools	shears	metal shears (probably) 6" long	1
0472	097			F-37	S-2	Square area NW of Gas Producers	factory tools	pincers	2 metal tapered prongs w/crooked ends, 1' long	1
0676	059			F-06	S-1	Scrape 1 Artifacts from Furnace 2	factory tools	file or chisel	rusted metal file or chisel shaped object that probably had a wooden handle at one time that fit on iron spike	1
0690	110			F-06	S-2	Artifacts from Furnace 2, collected during scrape 2	factory tools	spline shaft	8 square spline shaft, graphite, 1" diam., .868" diam. circle, 5.5" long, w/flutes on side, each spline is .142" wide, part of gear, shaft to turn, but still move back and forth, graphite unusual, light, useful at foundry for casting spline shaft in steel	1
0696	075			F-05	S-1	Artifacts from Furnace 1, scrape 1	factory tools	saw	metal wire shaped like a frame for a small saw	1
0755	109			F-05		Artifacts from the modern trench through Furnace 1	factory tools	unknown	metal, 7" long, 1.5" wide, .375" thick, rectangular, has spike that indicates where it would have inserted into a wooden handle	1
0997	030	T-9		F-14		Artifacts from within burnt area	factory tools	clock	w/2 wind up springs, 1 escapement gear, served two purp.: time and: chimes, music or time punch card, thin brass that would spin implies music or chimes. Gears are brass, shafts, wind up springs: sleet? Other parts have broken off main body	1
1135	011	T-2				Artifacts from Trench 2	factory tools	wheel	for pulley or railroad, if railroad is for a narrow gauge railroad, 7 spokes, shaft attached	1
1190	076			F-03	S-1	Artifacts from Lehr 2, scrape 1	factory tools	cart wheel	3" diameter	1
1229	097			F-37	S-2	Square area NW of Gas Producers	factory tools	vent cap	pressure release, circular, flat, spike through center, 6" diameter circle, 2 holes-one on each flap	1
1239	011	T-2				Artifacts from Trench 2	factory tools	tank buck stay	rod/pin, metal, w/circular end, 11.75" long, 1" diam., 3" diam. of circle, holds tank together in continuous form	1
1241	059			F-06	S-1	Scrape 1 Artifacts from Furnace 2	factory tools	wedge	or chisel, 11" long, .5" thick tapering to .25", squarish head, end is flattened out and wider	1
1242	059			F-06	S-1	Scrape 1 Artifacts from Furnace 2	factory tools	metal handle	long square rod, curved into a circle at end	1
1248	001				surface	General surface collection	factory tools	valve wheel	iron, 6 spokes, 14" diameter	1

0430	084			F-05	S-2	New area south of T-2	other	hoe blade	8.5" long	1	

Other Catalog

0432	059			F-06	S-1	Scrape 1 Artifacts from Furnace 2	other	metal	iron rectangular thing, 10" long, 2" wide, .25" thick	1	
0434	092			F-05	S-2	Interior of arches	other	wire	fragments of metal wire	3	
0448	080			F-12	S-1	Artifacts from oven and west wall scrape	other	wire	1.5" long	1	
0450	028	T-6		F-12		Artifacts from Oven feature	other	slag		1	
0454	076			F-03	S-1	Artifacts from Lehr 2, scrape 1	other	pipe	metal pipe fragment, 1" diameter, 2.5" long	1	
0461	107				S-1	General surface collection, after scrape 1	other	wire	square metal wire, curves at end, possibly part of a tool, pincers? approx. 6" long	1	
0462	019	T-3				Artifacts from Trench 3	other	metal	metal bar, bent in an "L" shape	1	
0463	013	T-2		F-04		Metal pieces protruding from F-04	other	wire	metal wire fragment	2	
0466	020	T-3		F-09	F, H	Brick feature 27' NE of W trench datum	other	wire	fragment	1	
0475	092			F-05	S-2	Interior of arches	other	can	base of a metal can, 3.5" diameter	1	
0476	055		3	F-A	B	Black stain, possible historic fill between Lehr 1	other	wire	metal wire fragment	1	
0478	003	T-1				Artifacts from Trench 1	other	hinge	metal hinge thing, perhaps part of blinds, station shop?	1	
0480	055		3	F-A	B	Black stain, possible historic fill between Lehr 1	other	slag	sample	1	
0500	110			F-06	S-2	Artifacts from Furnace 2, collected during scrape 2	other	asbestos	cloth or paper, possibly asbestos	1	
0514	001				surface	General surface collection	other	plastic	dense, white, thick	1	
0520	093			F-05	S-2	Interior south of arches, north of Trench 2	other	plastic	2 caps, 1 pink bubble wand	3	
0524	075			F-05	S-1	Artifacts from Furnace 1, scrape 1	other	metal	1/2 ring, painted blue	1	
0528	109			F-05		Artifacts from the modern trench cutting through Furnace 1	other	metal	small pipe?	1	
0578	110			F-06	S-2	Artifacts from Furnace 2, collected during scrape 2	other	pipe	concrete fragment	1	
0634	059			F-06	S-1	Scrape 1 Artifacts from Furnace 2	other	metal washer	rusted, 1.75" diameter	1	
0639	075			F-05	S-1	Artifacts from Furnace 1, scrape 1	other	nut	metal	1	

Other Catalog

0653	110			F-06	S-2	Artifacts from Furnace 2, collected during scrape 2	other	nut and bolt	rusted together	1	
0659	108			F-05		Artifacts from Furnace 1, outside of Trench 2	other	asbestos	fabric for paper/shingle paper or asbestos?	1	
0661	093			F-05	S-2	Interior south of arches, north of Trench 2	other	coal		1	
0667	093			F-05	S-2	Interior south of arches, north of Trench 2	other	metal	rusted metal sheet? fragment	1	
0668	084			F-05	S-2	New area south of T-2	other	carbon rod?	2" long, .25" diameter, old battery piece?	1	
0670	022	T-3		F-10		Artifacts from chimney area	other	rod	metal, fragment, .75" diameter, 2.5" long	1	
0674	011	T-2				Artifacts from Trench 2	other	rod	iron, fragment, .75" diameter, 3" long	1	
0674	011	T-2				Artifacts from Trench 2	other	metal	misc., rusted	1	
0674	011	T-2				Artifacts from Trench 2	other	metal	square, 2.25"x2.25", .1875" thick, w/a .625" diameter hole in center	1	
0674	011	T-2				Artifacts from Trench 2	other	wire	fragments	2	
0675	110			F-06	S-2	Artifacts from Furnace 2, collected during scrape 2	other	tube	metal (not iron) thin tube, 1" long, .75" diameter, U-shaped openings on one end	1	
0677	107				S-1	General surface collection, after scrape 1	other	latch	bronze portion of a latch, part of cat.# 678	1	
0678	067				S-1	Artifacts from area north of T-1, including dark stain, and both lehrs	other	latch	bronze portion of a latch, attaches to cat.# 677	1	
0689	059			F-06	S-1	Scrape 1 Artifacts from Furnace 2	other	pipe	or rod, (too rusted to tell) with a metal object screwed to it, possibly a switch or valve?	1	
0692	086				S-2	Artifacts from south of Furnace 1	other	metal	fragments, rusted	3	
0692	086				S-2	Artifacts from south of Furnace 1	other	wire	fragments, some twisted together	6	
0693	086				S-2	Artifacts from south of Furnace 1	other	bolt	with nut? metal, 5" long, .5" diameter	1	
0693	086				S-2	Artifacts from south of Furnace 1	other	metal	fragments, thick, odd shape	1	
0693	086				S-2	Artifacts from south of Furnace 1	other	rod	metal, slightly flattened, 4.25" long, .75" wide	1	

Other Catalog

0693	086				S-2	Artifacts from south of Furnace 1	other	spike	metal, probably railroad	1	
0695	086				S-2	Artifacts from south of Furnace 1	other	metal	ferrous, possible "cap" for end of pipe or other object with internal threading, largest diameter=3"	1	
0697	075			F-05	S-1	Artifacts from Furnace 1, scrape 1	other	spike	railroad	1	
0697	075			F-05	S-1	Artifacts from Furnace 1, scrape 1	other	wire	tangle of wire, copper?	1	
0710	005	T-1 extension		F-01		Artifacts collected from feature area	other	metal	fragments, rusted	4	
0728	019	T-3				Artifacts from Trench 3	other	coal		1	
0733	019	T-3				Artifacts from Trench 3	other	finial?	or stopper? brass or copper decorative thing, 2.25" long, .75" diameter, end tapered to .5" diameter, octagonally faceted w/half sphere rounded on one end	1	
0735	019	T-3				Artifacts from Trench 3	other	spike	railroad	1	
0735	019	T-3				Artifacts from Trench 3	other	wire		1	
0754	092			F-05	S-2	Interior of arches	other	coal		4	
0755	109			F-05		Artifacts from the modern trench cutting through Furnace 1	other	metal	strip, 7" long, .25" thick, .75" wide	1	
0763	095			F-36	S-2	Artifacts from coal pit	other	coal	sample lumps	9	
0764	097			F-37	S-2	Square area NW of Gas Producers	other	asbestos	large sheets of fabric, probably asbestos, discarded in laboratory	2	
0804	049		1		D	Dark organic fill with glass and ceramics	other	wire	clump of plastic coated wire in 5 colors	1	
0823	049		1		D	Dark organic fill with glass and ceramics	other	metal	misc. metal fragment	1	
0841	086				S-2	Artifacts from south of Furnace 1	other	slag	sample	1	
0842	110			F-06	S-2	Artifacts from Furnace 2, collected during scrape 2	other	mica?	thin fragment of mica or possibly plastic, 1.25" diameter, cap?	1	
0861	097			F-37	S-2	Square area NW of Gas Producers	other	light bulb	metal base	1	
0866	097			F-37	S-2	Square area NW of Gas Producers	other	wire	fragment	1	

Other Catalog

0883	097			F-37	S-2	Square area NW of Gas Producers	other	washer	1.5" diameter	1	
0891	049		1		D	Dark organic fill with glass and ceramics	other	coal		3	
0894	011	T-2				Artifacts from Trench 2	other	metal	misc.	2	
0899	038	T-8				Artifacts from Trench 8	other	metal	misc.	2	
0907	011	T-2				Artifacts from Trench 2	other	metal	brass or copper, rectangle, 1.5" long, .5" wide, .125" thick	1	
0916	011	T-2				Artifacts from Trench 2	other	pipe	metal, split in half	1	
0923	097			F-37	S-2	Square area NW of Gas Producers	other	metal	can/bottle lip, neck, shoulder	1	
0931	097			F-37	S-2	Square area NW of Gas Producers	other	chicken wire	clump of fencing material	1	
0938	097			F-37	S-2	Square area NW of Gas Producers	other	metal	wire ring, 1.5" diameter	1	
0946	039	T-9		F-16		Artifacts from Internal North-South factory wall (gray brick)	other	metal lid	fragment, approx. 2.25" diameter, molded writing illegible	1	
0949	026	T-7		F-13		Artifacts from, wall or floor, extension of Lehr 1 (F-2)	other	wire	cross of straight wires	1	
0951	097			F-37	S-2	Square area NW of Gas Producers	other	asbestos	paper or fabric? asbestos?	5	
0953	027	T-7				Artifacts from Trench 7	other	plastic	flat, thick, opaque white	1	
0956	038	T-8				Artifacts from Trench 8	other	spike	railroad	1	
0973	097			F-37	S-2	Square area NW of Gas Producers	other	spring	or coil, metal	1	
0976	027	T-7				Artifacts from Trench 7	other	wire	fragment	1	
0977	085			F-35	S-2	Artifacts from walk between furnaces	other	rod	iron, "L" shaped, corner reinforcement? 11" long, 1.25" x 1.5"	1	
0987	097			F-37	S-2	Square area NW of Gas Producers	other	wire	woven, fragments, looks like a metal mat	2	
0989	097			F-37	S-2	Square area NW of Gas Producers	other	leather?	paper-like, marked: "...OMPANY..."	3	
0990	097			F-37	S-2	Square area NW of Gas Producers	other	cable	fragment of twisted cable, 4" long, .375" diameter	1	
0991	039	T-9		F-16		Artifacts from Internal North-South factory wall (gray brick)	other	metal	flat fragment	1	
0996	097			F-37	S-2	Square area NW of Gas Producers	other	hinge	large, decorative, metal, rod is .75" diameter, strap hinge for holding multiple board planks together	1	

Other Catalog

1005	014	T-2		F-05		Artifacts from Furnace 1 area, in Trench 2	other	metal	mass of rust	1	
1013	032	T-9				Artifacts from Trench 9	other	hook	iron or steel	1	
1017	001				surface	General surface collection	other	pipe	metal, modern? one has internal thread, 2.5" diameter, 2.75" long, other has external thread, 2.25" x 4" long, they screw into each other	2	
1020	032	T-9				Artifacts from Trench 9	other	can	lid, metal, 6" diameter, hole in center	1	
1021	097			F-37	S-2	Square area NW of Gas Producers	other	pipe	metal, rusted, 6.5" long, narrows at one end to fit inside (another pipe?), large washer on the other end, 2.5" diameter, is bolted on	1	
1023	032	T-9				Artifacts from Trench 9	other	pipe	fragments of rusted pipe, .5" diameter	2	
1024	014	T-2		F-05		Artifacts from Furnace 1 area, in Trench 2	other	metal	mass of rusted metal	1	
1025	059			F-06	S-1	Scrape 1 Artifacts from Furnace 2	other	metal	thin, rusted, metal sheet fragments	2	
1070	014	T-2		F-05		Artifacts from Furnace 1 area, in Trench 2	other	plastic	hard opaque white, vessel fragment?	1	
1087	032	T-9				Artifacts from Trench 9	other	metal	metal lid?, with metal rectangular thing on top, filled with cemented dirt	1	
1097	087			F-29	S-2	Artifacts from Gas Producers area	other	pipe	fragments of rusted metal	3	
1098	014	T-2		F-05		Artifacts from Furnace 1 area, in Trench 2	other	wire	fragments	1	
1099	032	T-9				Artifacts from Trench 9	other	can	fragment of rusted metal, white paint w/blue blobs	1	
1100	097			F-37	S-2	Square area NW of Gas Producers	other	metal	pleated sheet fragment	1	
1101	049		1		D	Dark organic fill with glass and ceramics	other	wire	fragment	1	
1102	059			F-06	S-1	Scrape 1 Artifacts from Furnace 2	other	rebar	2 metal fragments	1	
1103	110			F-06	S-2	Artifacts from Furnace 2, collected during scrape 2	other	iron	flat w/2 circular areas, one on each side, would have been a joint between pipes, flat thing is closer w/a curled handle that was inserted or removed between pipes to control airflow (like for suction on vacuum)	1	

Other Catalog

1104	086				S-2	Artifacts from south of Furnace 1	other	metal	misc. fragments, one folded like a bag shape	5	
1104	086				S-2	Artifacts from south of Furnace 1	other	wire	metal fragments	4	
1106	051		1		E	Greasy black layer	other	spike	railroad	1	
1106	051		1		E	Greasy black layer	other	strap	rusted metal	2	
1106	051		1		E	Greasy black layer	other	wire	rusted	4	
1108	049		1		D	Dark organic fill with glass and ceramics	other	strap	metal, fragment, .5" wide, 2.5" long	2	
1109	076			F-03	S-1	Artifacts from Lehr 2, scrape 1	other	wire	fragments, or thin cable	2	
1110	051		1		E	Greasy black layer	other	metal	misc. fragments	28	
1110	051		1		E	Greasy black layer	other	slag		2	
1111	049		1		D	Dark organic fill with glass and ceramics	other	pipe	rusted metal fragment	1	
1112	097			F-37	S-2	Square area NW of Gas Producers	other	rubber	car parts?	2	
1114	032	T-9				Artifacts from Trench 9	other	wire	fragments	2	
1115	097			F-37	S-2	Square area NW of Gas Producers	other	can	lid, w/spout, oil can?, .625" diameter opening, 2.75" diameter of can at shoulder	2	
1116	097			F-37	S-2	Square area NW of Gas Producers	other	can	lid, metal	1	
1117	097			F-37	S-2	Square area NW of Gas Producers	other	spike	railroad	1	
1117	097			F-37	S-2	Square area NW of Gas Producers	other	spike	thinner and longer than railroad spike	1	
1118	073			F-29	S-1	Artifacts from Gas Producers, south of factory	other	spike	railroad, fragment	1	
1119	059			F-06	S-1	Scrape 1 Artifacts from Furnace 2	other	spike	railroad	1	
1120	108			F-05		Artifacts from Furnace 1, outside of Trench 2	other	metal brace	2-0.5" diameter, metal bolts held in place by a horizontal plate-0.375" thick, 5" long	1	
1121	097			F-37	S-2	Square area NW of Gas Producers	other	can	base, metal, dome profile, circular, 3" diameter	1	
1124	097			F-37	S-2	Square area NW of Gas Producers	other	graphite	rod, 2.5" long, .75" diameter, part of battery?	1	
1125	108			F-05		Artifacts from Furnace 1, outside of Trench 2	other	wire	fragment	1	

Other Catalog

1126	110			F-06	S-2	Artifacts from Furnace 2, collected during scrape 2	other	cable	metal	1	
1127	080			F-12	S-1	Artifacts from oven and west wall scrape	other	clinker	fragment	4	
1128	087			F-29	S-2	Artifacts from Gas Producers area	other	wire	rusted mass	1	
1129	110			F-06	S-2	Artifacts from Furnace 2, collected during scrape 2	other	metal	flat, circular, w/hole and raised ridge across center, diameter 6", vent cap pressure release	1	
1131	032	T-9				Artifacts from Trench 9	other	rod	metal?, .875" diameter, 2.5" long	1	
1134	059			F-06	S-1	Scrape 1 Artifacts from Furnace 2	other	wire	or thin cable, twisted into curly-Q	1	
1139	087			F-29	S-2	Artifacts from Gas Producers area	other	wire	twisted into a perfect circle, 4" diameter	1	
1140	073			F-29	S-1	Artifacts from Gas Producers, south of factory	other	hook and wire	metal wire thing w/hook, like birdcage top	1	
1140	073			F-29	S-1	Artifacts from Gas Producers, south of factory	other	wire	possibly broken from hook and wire thing	3	
1141	049		1		D	Dark organic fill with glass and ceramics	other	cable	metal wire, w/one end spiral twisted	1	
1142	053		2	F-12	A	Compact, mixed fill	other	cable	metal, .25" diameter	1	
1143	076			F-03	S-1	Artifacts from Lehr 2, scrape 1	other	can	gold colored, metal, soda size	1	
1144	085			F-35	S-2	Artifacts from walk between furnaces	other	wire	fragment, metal	1	
1148	049		1		D	Dark organic fill with glass and ceramics	other	slag	sample collected from test unit	4	
1149	049		1		D	Dark organic fill with glass and ceramics	other	strap	metal, 1" wide, .25" thick, formed into a circle, 4" diameter	1	
1151	108			F-05		Artifacts from Furnace 1, outside of Trench 2	other	rod	metal, 10.5" long, .75" diameter	1	
1153	049		1		D	Dark organic fill with glass and ceramics	other	wire	fragment	1	
1155	049		1		D	Dark organic fill with glass and ceramics	other	metal	misc.	5	
1155	049		1		D	Dark organic fill with glass and ceramics	other	wire	misc. fragments	6	
1156	075			F-05	S-1	Artifacts from Furnace 1, scrape 1	other	pipe	metal, 1.25" diameter	1	

Other Catalog

1157	108			F-05		Artifacts from Furnace 1, outside of Trench 2	other	pipe	metal, fragment, split down middle, 11" long, 1.5" diameter	1	
1164	049		1		D	Dark organic fill with glass and ceramics	other	wire	bent, copper?	1	
1169	091			F-28	S-2	Artifacts from chimney airshaft	other	cable	metal fragment	1	
1169	091			F-28	S-2	Artifacts from chimney airshaft	other	wire	metal fragment	3	
1170	080			F-12	S-1	Artifacts from oven and west wall scrape	other	asbestos	strap of fabric-like material	1	
1172	049		1		D	Dark organic fill with glass and ceramics	other	pipe	concrete, fragment	1	
1173	067				S-1	Artifacts from area north of T-1, including dark stain, and both lehrs	other	grog and clay	interior furnace lining material, glassy where it touched fire, lining protected brick from heat	1	
1175	067				S-1	Artifacts from area north of T-1, including dark stain, and both lehrs	other	spike	or pin, 1' long, metal	1	
1176	067				S-1	Artifacts from area north of T-1, including dark stain, and both lehrs	other	pipe	metal, fragment, 5" long, .75" diameter	1	
1176	067				S-1	Artifacts from area north of T-1, including dark stain, and both lehrs	other	strap	metal, 10" long, 1" wide	2	
1177	014	T-2		F-05		Artifacts from Furnace 1 area, in Trench 2	other	cable	fragment, metal, thick wire	2	
1178	097			F-37	S-2	Square area NW of Gas Producers	other	graphite	cylinder, battery center? w/metal rod w/copper top through center	1	
1180	087			F-29	S-2	Artifacts from Gas Producers area	other	cork screw		1	
1183	097			F-37	S-2	Square area NW of Gas Producers	other	spring	fragment of a metal coil or spring	8	
1184	087			F-29	S-2	Artifacts from Gas Producers area	other	wire	fragment, both ends twisted	1	
1187	076			F-03	S-1	Artifacts from Lehr 2, scrape 1	other	metal	thick, flat, fragment	2	
1188	049		1		D	Dark organic fill with glass and ceramics	other	metal	misc. flat fragment, one w/a small hole	2	
1189	053		2	F-12	A	Compact, mixed fill	other	clinker	sample collected from test unit	3	
1189	053		2	F-12	A	Compact, mixed fill	other	slag	sample collected from test unit	3	
1192	073			F-29	S-1	Artifacts from Gas Producers, south of factory	other	pipe	iron, 10.5" long, .75" diameter	1	

Other Catalog

1193	087			F-29	S-2	Artifacts from Gas Producers area	other	pipe	metal, not twisted, looks like part of an auger, constricted at center, split along one side, 6" long, 1.75" diameter	1	
1196	109			F-05		Artifacts from the modern trench cutting through Furnace 1	other	metal cover	for something, circular, w/a circle cut out of top (almost a "c" shape), back side has chambers and holes, front says "...AMMON" "...N...R", beveled edge, 2.25" diameter	1	
1198	076			F-03	S-1	Artifacts from Lehr 2, scrape 1	other	beam	iron, large	1	
1198	076			F-03	S-1	Artifacts from Lehr 2, scrape 1	other	rod	iron, w/rectangular cross section, .75" x .5" diameter, 10" long	1	
1200	019	T-3				Artifacts from Trench 3	other	metal plate	broken along rivets, 9" long, .75" thick, 4.75" wide, tapering to 3.25" wide, hinge?	1	
1201	044	B-2		F-05		Artifacts from Block 2	other	cable	metal, coated w/green plastic	1	
1204	011	T-2				Artifacts from Trench 2	other	pipe	metal, 4.5" long, 1" diameter, .75" opening diameter	1	
1205	073			F-29	S-1	Artifacts from Gas Producers, south of factory	other	strap	metal, w/one end flattened and spread out, 5.5" long, 1" wide, .25" thick	1	
1207	086				S-2	Artifacts from south of Furnace 1	other	pipe	metal, w/ring around top, all rusted together	1	
1210	047	B-3		F-02		Artifacts from Block 3 (Lehr 1)	other	wire	fragment	2	
1214	046	B-4		F-06		Artifacts from Block 4 (Arc of Furnace 2)	other	strap	thin metal (aluminum?) 1.125" wide	1	
1215	097			F-37	S-2	Square area NW of Gas Producers	other	pipe	metal frag., 6" long, 1.25" diameter, .875" diameter opening, widens at one end to 2" diameter (1.5" opening), rusted	1	
1216	049		1		D	Dark organic fill with glass and ceramics	other	wire	fragment	1	
1217	097			F-37	S-2	Square area NW of Gas Producers	other	rod	bent into shepards hook shape, 10"	1	
1221	073			F-29	S-1	Artifacts from Gas Producers, south of factory	other	bolt	large, metal, possibly spike, 8.5" long, 1" diameter, round head	1	
1221	073			F-29	S-1	Artifacts from Gas Producers, south of factory	other	spike	large, metal, possibly bolt, square head, 1'1" long, 1" diameter	1	

Other Catalog

1222	086				S-2	Artifacts from south of Furnace 1	other	latch?	bronze object w/iron handles, mirror images of each other, but angles are different	2	
1223	075			F-05	S-1	Artifacts from Furnace 1, scrape 1	other	wire	fragments, some cemented together in cross pattern, part of fence?	23	
1224	086				S-2	Artifacts from south of Furnace 1	other	bracket	iron, 2 oval holes, 6.5" long	1	
1225	097			F-37	S-2	Square area NW of Gas Producers	other	frame	light metal, fragment, thin, painted blue	1	
1228	086				S-2	Artifacts from south of Furnace 1	other	strap	iron, 7" long, .75" wide, .25" thick	1	
1230	001				surface	General surface collection	other	metal	stainless steel? top of something, like an auger, not rusted, 4.25" tall, 2.5" diameter	1	
1231	073			F-29	S-1	Artifacts from Gas Producers, south of factory	other	metal	twisted, rusted, part of gas producer?, includes portion w/strap bolted to it	1	
1231	073			F-29	S-1	Artifacts from Gas Producers, south of factory	other	metal	sheet, fragment	1	
1232	097			F-37	S-2	Square area NW of Gas Producers	other	pipe	fragment, 3" diameter, one end is vented to attach to another pipe?	1	
1233	087			F-29	S-2	Artifacts from Gas Producers area	other	pipe	fragment, one is 1.5", .75" opening diameter, other is 1", .75" opening diameter	2	
1233	087			F-29	S-2	Artifacts from Gas Producers area	other	strap	metal, fragment	1	
1233	087			F-29	S-2	Artifacts from Gas Producers area	other	wire	fragment	2	
1234	045	B-1		F-12		Artifacts from Block 1	other	furnace lining?	hunk of furnace lining material? one side is vitrified w/a dark brown glaze	1	
1235	059			F-06	S-1	Scrape 1 Artifacts from Furnace 2	other	pipe	w/thin metal wires running through it, .75"	1	
1236	087			F-29	S-2	Artifacts from Gas Producers area	other	metal	very heavy, 1.75" thick, 4.25" x 4.25", rounded on one end like a "hoof print"	1	
1237	097			F-37	S-2	Square area NW of Gas Producers	other	cable	metal, made from 8 twisted metal wires, .5" diameter	1	
1238	097			F-37	S-2	Square area NW of Gas Producers	other	pipe	fragment, .75" diameter	1	
1243	059			F-06	S-1	Scrape 1 Artifacts from Furnace 2	other	rebar	metal rods	2	

Other Catalog

1245	097			F-37	S-2	Square area NW of Gas Producers	other	metal	heavy, triangular, w/spike-like end, 8.5" long, 4" wide, 1.5" thick	1	
1246	047	B-3		F-02		Artifacts from Block 3 (Lehr 1)	other	metal	twisted, rusted, fragment, 10" long	1	
1247	073			F-29	S-1	Artifacts from Gas Producers, south of factory	other	wire	bent fragment of metal	2	
1249	003	T-1				Artifacts from Trench 1	other	metal	large, iron, .5" thick, flat metal sheet, bent 90 degrees at one end, 1'3" x 11"	1	
1250	073			F-29	S-1	Artifacts from Gas Producers, south of factory	other	pipe	2" diameter, w/rounded bulb on end, 1'3.5" long, rusted	1	
1251	074			F-22	S-1	Artifacts from fill and rubble layer above brick floor in Lehr 2 area	other	rod	metal, slightly twisted, 1'9" long, .5" diameter tapering to a point	1	
1252	050	B-3		F-02		Artifacts from on top of Brick in fill/clay, Lehr 1 area	other	pipe	bent, metal, .75" diameter	1	
1254	003	T-1				Artifacts from Trench 1	other	sluice	shaped metal fragment, 8" long, 4" wide, tapering to 2" wide, .125" thick	1	
1255	075			F-05	S-1	Artifacts from Furnace 1, scrape 1	other	rod	or wire, metal, straight, one end has thick concretion	1	
1256	059			F-06	S-1	Scrape 1 Artifacts from Furnace 2	other	metal	flat, rectangular, 11.75" long, 1.25" wide, .875" thick	1	
1257	001				surface	General surface collection	other	pipe	1'2" long, rusted, hole not apparent, but is fairly light, 1" diameter	1	
1258	075			F-05	S-1	Artifacts from Furnace 1, scrape 1	other	pipe	1'4.5" long, .5" diameter, large square on one end, 1.25" diameter w/"window" hole on one side	1	
1259	097			F-37	S-2	Square area NW of Gas Producers	other	beam support	or small rail? 1'3" long, bent on end, 1.75" wide	1	
1260	073			F-29	S-1	Artifacts from Gas Producers, south of factory	other	metal	sheet, bent 90 degrees, looks like trough, 20" long, 1.5" wide	1	
1261	085			F-35	S-2	Artifacts from walk between furnaces	other	metal	rectangular, 16.5" long, 2.75" wide, .25" thick	1	
1262	019	T-3				Artifacts from Trench 3	other	cable	bent into shape of a loop, 12" x 9" .5" diameter, part of furnace or railroad?	1	
1263	040	T-8		F-17		Artifacts from F-17	other	metal	misc.	3	
1264	016	T-2		F-06		Artifacts from Furnace 2 area, in Trench 2	other	bolt	large, 9" long, .5" diameter, each w/square nut on each end, one has a washer on each end	2	

Other Catalog

1265	001				surface	General surface collection	other	metal	part of a container or machine?, looks like a metal shoe, top side of flat portion is marked: "...27-28" "SIZE III...NM" 5.5" x 10.5" x 3"	1	
1266	097			F-37	S-2	Square area NW of Gas Producers	other	rod	20" long, metal, rectangular loop on end, .5" diameter	1	
1267	110			F-06	S-2	Artifacts from Furnace 2, collected during scrape 2	other	pipe	metal, not very rusted, 1" diameter, 21" long	1	
1268	047	B-3		F-02		Artifacts from Block 3 (Lehr 1)	other	rod	or cable, metal, 23" long, .75" diameter	1	
1272	052	T-3	1		F	Artifacts from Test Unit 1, strat. F	other	coal	small	5	

Personal and Recreational Catalog

0657	097			F-37	S-2	Square area NW of Gas Producers	personal items	shoe	leather? shoe heel	1
0775	087			F-29	S-2	Artifacts from Gas Producers area	personal items	button	shell, 1" diameter	1
0510	059			F-06	S-1	Scrape 1 Artifacts from Furnace 2	recreational	marble	blue and opaque white swirled glass marble, patinated	1
0529	074			F-22	S-1	Artifacts from fill and rubble layer above brick floor in Lehr 2 area	recreational	marble	green and opaque white glass swirled marble	1
0595	007	T-1		F-02		Artifacts from Lehr 1 area	recreational	toy tire	rubber, 2.5" diameter	1
0596	093			F-05	S-2	Interior south of arches, north of Trench 2	recreational	marble	blue and opaque white glass swirled marble	1
0600	108			F-05		Artifacts from Furnace 1, outside of Trench 2	recreational	marble	brown stoneware marble?	1
0720	019	T-3				Artifacts from Trench 3	recreational	marble	white, blue, yellow, clear swirled glass marble	1

**APPENDIX D: GLOSSARY OF ARCHEOLOGICAL AND
GLASS-MAKING TERMS**

GLOSSARY OF ARCHEOLOGICAL TERMS

Artifacts	material remains of a culture (for example, bottle glass, buttons, and ceramics)
Coastal Plain	relatively low-lying region bordering the Atlantic ocean and the Piedmont Region. The division between the Piedmont Region and the Coastal Plain is marked by the Fall Line.
Atlatl	a spear thrower, a short weighted stick used to increase range and accuracy of projectiles.
Coniferous	vegetation which does not lose foliage at the end of the growing season; evergreen vegetation.
Deciduous	vegetation which sheds or loses foliage at the end of the growing season.
Ecofact	plant and/or animal remains found in their natural state often utilized by man; used to gain insight about ancient diet and environment.
Feature	any soil disturbance or discoloration that reflects human activity, or an artifact too large to remove without destroying (for example, a foundation).
Historic	the time period after the appearance of written records. In the New World, this generally refers to the time period after the beginning of European settlement at approximately 1600 A.D.
In Situ	in the original place.
Integrity	not disturbed; maintaining the original design and location.
Loam	a loose soil composed of roughly equal parts silt, clay, and sand, especially a kind containing organic matter and of great fertility.
Munsell Notation	a standardized method for describing soil color based on three variables - Hue, Value, and Chroma. A Munsell Book contains pages of small colored chips for comparison to soil.
Piedmont Region	an area of gently rolling to hilly land lying between the Appalachian Mountains and the Atlantic Coastal Plain. The division between the Piedmont Region and the Coastal Plain is marked by the Fall Line.

Plowzone	in a plowed field, the upper layer of organic soil which is continually reworked by the plow. In the Middle Atlantic region this is about 8-12 inches.
Post Hole	a hole dug in the ground into which a post is placed.
Post Mold	an organic stain left by a decayed wooden post.
Prehistoric	the time period before the appearance of written records. In the New World, this generally refers to indigenous, Pre-European societies.
Projectile Point	strictly speaking, a stone tool worked on both faces attached to the head of an airborne item of weaponry, such as an arrow or a spear; frequently used indiscriminately when referring to any bifacially prepared lithic artifact.
Provenience	the three dimensional location of archeological data within the soil matrix at the time of discovery.
Sherd	a piece of broken pottery or glass.
STP	shovel test pit; an approximately 1.5 foot diameter hole dug at consistent intervals and systematically recorded to determine what cultural remains are within a project area. A positive STP is one that contains artifacts; a negative STP does not contain artifacts.
Stratigraphy	soil layering; the characteristics of each individual stratum of soil in an archeological site and its relationship to others in the sequence is critical to understanding the temporal and spatial characteristics of the site.
Strata	various soil layers of human or geological origin
TPQ	<i>terminus post quem</i> , the earliest date of manufacture of the most recent artifact found in a deposit.
Tool Kit	a collection of artifacts from a sealed context within a site interpreted as being designed for a specific function.
Topography	the physical features of a region.

GLOSSARY OF GLASS MAKING TERMS

Definitions and Figures were based Primarily on *The Parks Canada Glass Glossary* (Jones and Sullivan 1985) and *Glass: A Pocket Dictionary of Terms Commonly Used to Describe Glass and Glassmaking* (Whitehouse 1993).

Annealing	final slow cooling of a glass object.
Base	the bottom part of an object.
Batch	a mixture of raw materials that is melted in a pot or tank to make glass.
Blow Pipe	hollow iron rod used in manufacture of free-blown and blown-in-mold bottles.
Blown-in-Mold	a glass object formed by a person blowing air into glass until it fills a mold that gives the object its shape.
Body	the main part of a container.
Bore	the opening at the top of a container.
Burst-Off	hot glass was mouth-blown beyond the extent of a mold, creating a bubble that was burst creating a jagged top.
Cane	a solid rod of glass. Canes were often twisted together with other canes and encased in clear glass, or were twisted with air bubbles.
Cap Seat	a ledge just inside the bore that was designed to hold a cap or disc.
Closure	the method of sealing or closing a bottle or jar.
Continuous Tank	furnace that included tanks that were continuously charged and melted batch continuously.
Cup Bottom Mold	the hot glass fits into (rather than onto) the base forming area of the bottle mold.
Cullet	waste glass broken and gathered for remelting and reuse.
Day Tank	furnace that included tanks that were charged at the end of the day and melted a batch all night.

Dip Mold	a one-piece mold where the glass is added through the top. When the vessel is blown to the confinement of the mold, the vessel is lifted out of the top of the mold; the neck and finish are free-formed.
Embossed	raised glass letters or symbols on glass bottles or jars.
Finish	the top part of the neck of a bottle or jar that includes the lip and string rims that accommodated the closure.
Finishing-Tool	a hand-held tool used to form the finishes of containers. The tool included two 'jaws' that were placed on the outside of a bottle neck, and a plug placed inside the bottle neck. When turned, the contoured jaws formed the lip and string rims, and the plug formed the shape and size of the bore.
Fire Clay	clay able to be exposed to high temperatures without fusing; it was used for clay pots or crucibles for melting batches of glass.
Flutes	repeating pattern of distinct, concave forms parallel to each other.
Free Blown	a glass object formed entirely without the use of molds, usually with a hand-formed finish and base.
Furnace	an enclosed structure for producing heat to melt the batch into glass.
Gas Producer	a mechanism in which air and steam passed through a column of fuel (like coal) creating carbon dioxide and carbon monoxide, which was passed to the glass furnace to fuel the furnace.
Ghost Seam	an extra seam on the body of a machine-made bottle. The seam was created during the formation of the bottle preform; the seam remained after the preform was transferred to the full-size mold.
'Glory Hole'	a small, kiln-like structure heated with gas that provided heat to remelt a bottle top for final finishing.
Hutchinson Spring Stopper	a closure consisting of a loop and heavy wire attached to a rubber gasket that formed a seal on short-necked bottles that held carbonated beverages.
Lampworking	reheating glass tubing or canes in a Bunsen or other lamp to create new glass forms, including small vials and glass rods for light bulbs.
Lehr	a reheating oven for reheating and slowly cooling completed bottles.

Lid	a cover for a container.
Lightning-Type Closure	a closure patented in 1875 that consisted of a stopper of rubber or porcelain with a wire bail attached to a bottle neck with a wire tie.
Lip	The external, upper part of the finish.
Machine-Made	a glass object made by a machine blowing air into glass to fill a mold that gives the object its shape.
Machine Scar	an often circular scar left on the base of a container caused by the machine manufacturing process.
Manganese-Tinted	clear glass with manganese added to counteract the yellowish or greenish tint of glass with iron oxides. Manganese-tinted glass turns slightly pinkish or purplish over time and exposure to sunlight.
Marver	flat or slightly curved iron slab used to slightly cool and initially shape glass globs.
Mason Jar	characteristic jars with a screw top that were designed to hold fruit.
Mason Jar Lid Liner	a milk-glass disk that was inserted in a metal cap to protect food in fruit jars from a metallic taste.
Milk Glass	opaque white glass.
Mool	waste glass produced as a byproduct of bottle manufacture.
Mold Seam	a linear mark left on a bottle made in a mold of two or more parts. The mark resulted from glass seeping into the seam between parts of a mold.
Neck	the narrow part of a container between the shoulder and finish.
Optic Molding	a method of glass manufacture used primarily for table wares that involved glass being initially blown in a mold that included a pattern. The molded preform was then transferred to a plain mold. When glass was blown to the extent of the plain mold, the pattern on the preform was transferred to the interior, creating a patterned interior and a smooth exterior.

Owen's Machine	the first fully automatic bottle-making machine; it was developed in 1903 by Michael Owens. The Owen's machine left a feathery suction scar on the bases of bottles.
Panels	flat sides that divide a circular form into a six- or eight-sided form.
Patina	a layered crust produced by decomposition of glass, usually after deposition.
Plate Mold	a separate lettered plate that could be inserted into different standard molds to form embossed lettering on glass objects.
Pontil	a long iron rod attached to the base of an object that is still hot to hold the object for final forming.
Pontil Mark	a scar left on the base of an object where the pontil was attached.
Post Bottom Mold	a raised area centered in the bottom part of the bottle mold that forms the bottle base.
Pot	a fire clay container placed in the furnace in which a batch of glass ingredients is fused and kept molten.
Press Molding	glass is pressed with a plunger to the extent of a mold that often has a pattern, creating a patterned exterior surface on the glass object, and a smooth interior surface formed by the plunger.
Resting Point	the part of a container that rests on a surface when the container is standing upright.
Ribs	a repeating pattern of convex forms parallel to each other.
Ricketts-Type Mold	a three-piece mold consisting of a dip mold for the body and a two-piece mold for the shoulder and neck.
Shoulder	the part of the container that joins the neck to the body.
Snap-case	a tool used instead of a pontil to hold bottles for final finishing. The tool is a four-pronged iron case attached to an iron rod.
Stopper	a plug inserted into the neck of a vessel to seal it.

Stopper Finish	a ledge partway down the bore to accommodate a glass stopper wrapped in cork.
Striations	faint grooves or lines, often on bottle necks, that seem to be caused by the manufacturing process.
String Rim	a protruding ledge or ring near the top of the neck.
Tank	a large receptacle constructed in a furnace for melting the batch; tanks replaced pots during the late-nineteenth century.
Thread	a spiral ring of glass to accommodate a screw-top lid; threads may be internal or external, and continuous or discontinuous.
Turn- or Paste-Mold	the surface of the mold is wetted before being used. When a bottle is blown in the mold, the water turns to steam, and the bottle is separated from the mold by this thin layer of steam.
Two-Piece Mold	the base, body, shoulder, and neck of a bottle are formed together in a mold made of two pieces hinged together at the bottom or at the sides.
Valve Mark	a small circular mark on a bottle based possibly caused by a valve that ejected the preform out of the first mold so that it could be transferred to the full-sized mold for completion.
Vent Mark	a small raised glass dot resulting from glass seeping into pin-hole vents in molds.

Parts of a Bottle (based on Jones and Sullivan 1985:77)

260	stopper	patent	cylindrica	rounded	l	circular	.75"	2.75"	1.1875"	green tint	medicine	yes		

TYPE 3

(CAT. 51)

BASE

- probably a medicine bottle
- 2-part vertical mold with separate base
- circular base
- flanged lip
- cylindrical neck and body

Neck Shape	Shoulder Form	Body Shape	Base Shape	Open. Diam.	Height	Base Diam.	Color	Machine/Molded	Bottle Type/ Function	Vent Mark
cylindrical	rounded	cylindrical	circular	.375"	3.125"	1.1875"	amber	2 part vertical, separate base, post bottom mold	medicine	2

TYPE 4

(CAT. 63)

- cylindrical body and neck
- pronounced seam marks
- 2-part vertical mold with separate base
- 2 vent marks
- circular base
- horizontal striations around neck below lip
- straight finish folded outward to form flanged lip

Cat #	Parts	Bore	Lip	String Rim	Neck Shape	Neck Treat.	Shoulder Form	Body Shape	Resting Point	Base Shape	Base Profile	Open. Diam.	Height	Base Diam.	Color	Machine/ Molded
1079	lip, neck, shoulder	straight	bead rounded	none	cylindrical	none	rounded					.75"			clear	2 part, tooled finish
271	whole	straight	short flanged	none	cylindrical	none	rounded	cylindrical	flat	circular	shallow dome	.75"	2.75"	1.25"	clear	2 part, separate cup mold base

TYPE 12

Cat #	123
Parts	missing lip
Bore	straight
Neck Shape	tapered
Shoulder Form	sloped down
Body Shape	cylindrical
Base Shape	circular
Base Markings	"1545" on part of base made separately
Open. Diam.	.5"
Height	10" to break
Base Diam.	3"
Color	green tint
Other Markings	on body front: "ROBERT PORTNER BREWING CO." "ALEXANDRIA, VA." in diamond in center "TRADE TIVOLI MARK", "THIS BOTTLE NOT TO BE SOLD" on back it says "A.B. Co."
Machine/Molded	2 part vertical, separate base and separate center of base
Bottle Type/Function	beer

TYPE 14

Cat #	127	126
Parts	missing lip and part of neck	missing lip and neck
Shoulder Form	sloped down	sloped down
Body Shape	cylindrical	cylindrical
Base Shape	circular	circular
Base Markings	none	"OO"
Height	7.25"	6.75" to break
Base Diam.	2.5"	2.5"
Color	clear	clear
Other Markings	"ROBERT PORTNER BREWING CO. " "TRADE TIVOLI MARK" "ALEXANDRIA, VA" on shoulder	"ROBERT PORTNER BREWING CO. " "TRADEMARK TIVOLI" "ALEXANDRIA VA" on shoulder
Machine/Molded	2 part vertical, separate base?	molded? separate base
Bottle Type/Function	beer	beer
Vent Mark	2 on shoulder	
Comments	most of logo gone, thick glass	base and wall thickness is uneven

(Cat. 126)

TYPE 15

BASE (CAT. 128)

(CAT. 232)

(CAT. 128)

- 2-part vertical mold with separate base
- medicine bottles
- hand-tool finished
- Philadelphia oval base with three flat sides
- 4 vent marks on base
- resembles Type 8 bottles
- similar to Type 7 bottles, except not machine-made

TYPE 15

APPENDIX G: CHAIN OF TITLE

Chain of Title

1792

Indenture

Book X-1, Page 548

John West to Lawrence Hooff

10/21/1796

Book Z-1, Page 243

Indenture

John West to Richard Hewitt

John West grants and farm lets a two acre parcel of land to Richard Hewitt. this parcel is the equivalent of a square in the West End Village, bounded by Duke Street on the north, George Street on the East., Wolfe Street on the south, and Catherine Street on the west. The indenture states that Hewitt will pay fifty dollars annually for the use of this property and that he agrees to "raise a house of brick, stone, or framed, on each half acre lot hereby leased (to wit No. 3.4.13 and 14) each sixteen feet square at least with a brick chimney, two windows with twelve lights each and to complete the same by plastering and white washing it in a workman-like manner together with everything else necessary to make it a comfortable and convenient dwelling house..."

2/2/1798

Book A-2, Page 438

Richard Hewitt to John West

Hewitt grants and farmlets 2/3 acre of land on Duke Street to John West. The rent being one grain of corn annually. The lot is part of a square of ground rented to Hewitt by West at an earlier time. This parcel is a square that is divided into two lots, each on third of an acre. The lots are bounded as follows. The corner of Duke street and Catherine Street, running southwardly half the depth of the square and then parallel 82 feet east the center of the square and north to Duke Street. The second has it's beginning point at Duke Street and George Street, continuing south to half the square, west and then north back to Duke Street.

4/24/1806

Indenture

John and Elizabeth West and Frederick Trydal

West conveys a 1 1/3 acre parcel to Tyrdal for \$300. The parcel is bounded by Duke Street on the north and Wolfe Street on the south . It is unclear what the other boundaries are. The parcel had been rented to Richard Hewitt. Hewitt maintained a tenement on the corner lot, however more than one tenement is mentioned as part of this parcel.

4/18/1853

Deed
Book S-3, Page 298
Josephine Lyles to Thomas Javins

Josephine Lyles conveys the 2 acre village block to Thomas Javins.
This parcel was property of Elizabeth Lyles and was transferred to her children, Josephine, David, George and Mary. "The interest in which of the said Josephine, hereby conveyed being an undivided fourth part".

1854
Deed
Book V-3, Page 99
Thomas Abbott and Mary Elizabeth Lyles to Thomas Javins

Abbott and Lyles convey the property acquired by Lyles from Josephine Lyles to Thomas Javins.
This is the 2 acre village block.

8/25/1869
Deed
Book K-4, Page 177
Thomas Javins to Edward Javins

Thomas and Caroline Javins conveys the entire Parcel of land (West End Village block, 2 acres) to Edward Javins for \$1610.

3/1/1871
Deed
Book M-4, Page 201
Edward T. Javins and Cassius Auger

Edward Javins conveyed a parcel of land to Cassius Auger. Bounded on north by Duke Street, on the east by the land of Harrison Emerson, on the south by Wolfe Street extended and on the west by the land on Richard Rotchford for \$1000. This area encompasses the entire square or block.

5/15/1875
Deed
Book S-4, Page 271
Wesley and Catherine Makely to Charles Stuart

Wesley conveyed to Stuart a parcel of land (including buildings) bounded by Duke Street on the north, the land of Harrison Emerson on the east, Wolfe Street on the south and the land on

Richard Rotchford on the west. This parcel excludes a lot to the south owned by the Alexandria and Fredericksburg Railroad Company.

10/4/1875

Deed

Book U-4, Page 26

Wesley and Catherine Makely to Ida L. Watkins, wife of James H. Watkins

Wesley Makely conveyed to Ida Watkins a parcel of land bounded by Duke Street on the north, the land of Harrison Emerson on the east, Wolfe Street on the south and Richard Rotchford's land on the west. With the exception of approximately 3/4 acre that was condemned by the Alexandria and Fredericksburg Railroad Company.

1892

Deed

Book N-5, Page 251

Ida L. Watkins to William H. Winston

Ida Watkins conveys approximately 2 acres to William Winston. This was part of a larger parcel. It is bounded by Duke Street on the north, Rotchford's property on the west, and the southern boundary is forty feet from the center track of the Washington Southern Railroad. Being a portion of a larger lot conveyed to Ida Watkins from Wesley Makely. The deed states that Watkins would lay out a lane or road (12 feet wide) between this property and the rest of her property.

11/4/1892

Deed

Book N/5, Page 331

William H. Winston and Annie E. Winston to L.E. Winston

William Winston and his wife conveyed part of the property they acquired from Ida Watkins to L.E. Winston. The lot was on Duke Street, 60 feet east of Rotchfords property line and measures 40 x 100 feet. The deed contained an agreement that no building would be erected within 20 feet of the north property line (1824 and 1822 Duke Street).

1893

Deed

Book 0-5, Page 244

Lilliam H. Winston to Andrew J. Christie, Peter Astryke, John S. Bordman, Joseph H. Ramsey, Lorenzo Wilford, George H. Schwartzman, Henry Schnell and Edward Reese of Royerford, Pennsylvania.

Winston conveys property to the grantees. Beginning 120 feet south of Duke Street, located at 20 foot wide alley that runs parallel to Duke Street, bounded on the west by a twelve foot alley

separating the 1800 block from the 1700 block. Proceeding 185 feet and 10.5 inches south to the Washington Southern Railroad line and proceeding west 305 feet and 10.5 inches to the western boundary of the parcel. This being part of a larger parcel that was conveyed to Winston from Ida Watkins.

Alexandria-Southern Properties, Inc.(grantor), CNS limited partnership (grantor and grantee), Atlantic Investment Company (as beneficiary Robert L. Dewey and Thams G. Johnson, Trustees), The City of Alexandria Virginia(grantor and grantee) and the United States of America(grantor).

The entities listed above consolidated the aforementioned properties and resubdivided them into twenty lots as shown on the plat titled, The Lots. The subdivision is designated 'Carlyle'.

Book 1510, Page 0160

9/4/94

Carlyle Development Corporation

Property known as Lots 500 - 504, Lots 507 - 512, Lots 601, 602, 613, 614, and Lots 800 - 803. The lots platted in Deed Book 1332, page 1542 and shown on plat (F-7240-1-1-32)dated 5/9/1994. The plat is titled, Plat Showing Various Easements and Resubdivision of Various Lots.

APPENDIX H: SITE FORM

Virginia Department of Historic Resources
Archaeological Site Inventory Form

VDHR Site Number: 44AX181
Other VDHR Number:

City/County: Alexandria
Site Name: Virginia Glass Company
Temporary Designation: Carlyle Square, Block D

Cultural/Temporal Affiliation: 1893 - 1914, Euro-American

Site Class: ☒ Terrestrial, Open-Air ☐ Terrestrial, Cave/Rockshelter ☐ Underwater

Thematic Contexts: Industry and extraction

Site Function: Glass Factory

Specialized Contexts:

USGS Quadrangle: Alexandria, Virginia

Loran:

UTM Zone: 18

Easting: 320900

Northing: 4296940

(Attach photocopy of appropriate section of USGS 7.5 minute series topographical map showing site boundaries.)

Physiographic Province: Piedmont

Drainage:

Landform: Urban

Aspect: Flat

Elevation: 30' above msl

Slope: 0-5%

Site Soils: (fill)

Adjacent Soils:

Nearest Water Source: Hooff Run, Cameron Run, Potomac R. Distance: 1000', 2500', 5000' respectively

Ownership Status: ☒ Private ☐ Public/Local:
☐ Public/State:
☐ Public/Federal:

Owner Name (if Private): Norfolk Southern/Carlyle Development Corp. Owner Telephone: 703-739-7705

Owner Address: 1755 C. Duke Street
Alexandria, VA 22134

Informant Name:
Informant Address:

Surveyed By: Phil Hill, Ph.D.

Affiliation: Dames & Moore

Date: 11-25-97

Address: 7101 Wisconsin Avenue, Suite 700
Bethesda, MD 20814

Site Dimensions: 200' X 200'

Survey Strategy: ☒ Historic Map Projection ☐ Informant ☒ Observation
☒ Surface Testing ☒ Subsurface Testing

Survey Description: Phase I survey consisted of excavation of six trenches by backhoe, under supervision of archeologists. Features were recorded, drawn, and photographed; trenches were profiled. Four test units were placed judge-mentally on the basis of the trench results. Diagnostic artifacts were retained.

Site Condition: The site appears to include intact brick features associated with different portions of the factory, including the furnaces and outer walls; artifacts related to the glass industry found.

Current Land Use: Not in use, but planned for development. Carlyle Station Shops until recently stood on the location of the site; demolished immediately prior to archeological survey.

Specimens Obtained: ☒ Yes ☐ No Depository: Alexandria Archaeology

Assemblage Description: Glass wasters (lump glass), medicine bottles, flasks, bottle necks, milk glass Ball canning jar seal, iron artifacts, iron cauldron, whiteware, glass tubes. Clear, amber, aqua, milk, and green-colored glass.

Specimens Reported: — Yes ☒ No

Reference(s):

A Phase I report of findings will be prepared

Additional Comments: The Virginia Glass Company began operation in 1893 on the south side of the 1800 block of Duke Street in Alexandria. The first company officials were a group of Germans from Pennsylvania who included: Edward S. Reeves, Henry Schnell, John S. Bordner, George H. Schwarzmann, Joseph Ramsey, Peter Astryke, Lorenzo Wolford, and J.H. Ramsey. A large portion of the bottles produced at the factory were made for the large Robert Portner Brewery located on N. St. Asaph Street in Alexandria.

The Virginia Glass Company rennovated the factory in June 1895 and January 1896. New facilities included a large warehouse and packing facility, and a new larger furnace. By 1896 more than eighty men were employed at the factory.

The factory facilities, except for the furnaces, burned down in 1905 when one of the lehns caught fire, and the fire control facilities were frozen. By 1905 only two of the eight original owners (John Bordner and Peter Astryke) maintained an interest in the company. The Virginia Glass Company rebuilt its facilities, but a second fire in 1914 forced the company to close.

The glass factory produced primarily green and amber-colored glass in the forms of beer and soda bottles, flasks, medicine bottles and preserve wares.

CURRICULUM VITAE

JANET L. FRIEDMAN, Ph.D.

Title	Program Director, Cultural Resource Services
Expertise	Cultural Resources Management Archeology and Historic Preservation Environmental Resource Management and National Environmental Policy Act Implementation
Academic Background	Ph.D., Anthropology/Archeology, Washington State University, 1975 M.A., Anthropology, University of California, Los Angeles, 1970 B.A., Anthropology, University of California, Los Angeles, 1967
Experience	Dr. Friedman is responsible for managing projects in environmental and cultural resource management and historic preservation. Cultural Resource Management • As Dames & Moore Program Manager for Cultural Resource Services, Dr. Friedman has managed a variety of cultural resource projects, including archeological and historic resource identification, evaluation, and mitigation; archival research; historic building assessments; and cultural resource management and planning. • Industrial archeological study and thematic National Register nomination of historic iron furnaces in the George Washington and Jefferson National Forests, Virginia. • Archeological survey at Patuxent River Naval Air Station, Maryland. • Fort Ritchie, Cultural Resource Management Plan, Historic Building Survey, and Historic Property Rehabilitation Guidelines, Fort Ritchie, Maryland. • West Valley Demonstration Project Cultural Resource Management Plan and Programmatic Agreement Planning, Predictive Model, and Determination of Eligibility, West Valley, New York. • Pennsylvania Sports Hall of Fame, Phase II Archeological Excavation, City Island, Harrisburg, Pennsylvania. • Dover Air Force Base Archeological Assessment, Predictive Model, and National Register Nomination for Hangar 1301, Dover, Delaware.

- Banyan Development Company, Cultural Resource Assessment and Zoning Support, Cherry Hill Peninsula, Virginia.
- U.S. Army Corps of Engineers, Archival Research to Support Phase I Hazardous Waste Cleanup Activities and Cultural Resource Assessment, Former Raritan Arsenal, Edison, New Jersey.
- Tacoma Public Utilities Relicensing Support and Cultural Resource Management Plan, Lake Cushman, Washington.
- Standard Chlorine of Delaware, Phase IA and Phase IB Cultural Resource Assessment, Delaware City, Delaware.
- Roebling Steel Mill Historic Study, Historic Building Assessment, and National Register Nomination, Florence Township, New Jersey.
- Historic Architecture Assessments and Historic Context Development. Separate studies for Lynchburg, Albemarle County, and Northampton County, Virginia; and Calvert County, Maryland.
- Mobile Bay Quarantine Station HABS documentation, Alabama.
- Georgia Department of Transportation, Archeological Sites Survey and Historic Resources Survey of U.S. 27 in Miller, Early, Clay, Randolph, and Stewart Counties, Georgia.
- Carlyle Square Archeological Project, Phase I identification, Phase II evaluation, and Phase III excavation of the Virginia Glass Co., a late nineteenth- through early twentieth-century bottle glass factory, Alexandria, Virginia.
- U.S. Army Corps of Engineers, Phase I archeological and architectural history investigations in the City of Cumberland, Kentucky for a Nashville District Army Corps Flood Protection project.
- Cherry Hill Phase I archeological survey of a 1,733-acre parcel of land for a private developer. Phase I survey identified forty-three sites requiring additional investigation. Sites included Early and Late Archaic camps, Woodland base camps, eighteenth- and nineteenth-century domestic sites, Civil War features, and a nineteenth-century industrial site.
- Lee Street Archeological Project, Phase I-III investigations of Civil War and nineteenth-century industrial resources for Lawrence Brandt, Inc. Alexandria, Virginia.
- As Special Assistant to the Director of Cultural Resource Planning at the Advisory Council on Historic Preservation (ACHP), developed programs for incorporating historic preservation planning in programs of Federal, state, and private agencies.
- As Departmental Historic Preservation Officer in the U.S. Department of Agriculture (USDA), represented the Secretary of Agriculture on the ACHP, coordinating historic preservation activities throughout the various agencies of the USDA.

- As Head Archeologist, USDA Forest Service, coordinated cultural resources program for the Forest Service, overseeing over 250 regional, forest, and district archeologists. Laid the groundwork for the current Forest Service program in Cultural Resources Management, writing the implementing regulations for the Department and the Forest Service, as well as for such other USDA agencies as Farmer's Home Administration and the Animal and Plant Health Inspection Service. Prepared the initial manual, handbook, and other baseline documents that shaped the Forest Service program.
- As Planning Team Archeologist, USDA Forest Service Hell's Canyon National Recreation Area Planning Team, Baker, Oregon, developed the cultural resources component of the Environmental Impact Statement (EIS) to evaluate the environmental impacts of designating that portion of the Snake River as a National Recreation Area. Developed the cultural resources section of the Management Plan, as well as preparing inventory and protection plans. Prepared paleontological and archeological overviews, directed field inventory, planned and participated in public involvement workshops, and directed professional symposia to identify priorities for managing sites.
- Directed a university's contract archeology program. Conducted archeological surveys and excavations, taught field courses, wrote reports, managed contracts, and prepared archeological components of environmental evaluation documents.
- **Public Involvement and Training**
- Responsible for managing Dames & Moore's Eastern Division Public Involvement Services. Manage projects in community involvement, training, public education and other aspects of public involvement. Projects include:
- Managed Public Involvement Program for Connecticut Hazardous Waste Management Service volunteer siting program.
- Managed Public Involvement Response Plans for 12 facilities being closed under the Base Realignment and Closure Program (BRAC).
- Developed and taught course in identifying historic properties for Federal Deposit Insurance Corporation.
- Developed and taught seminars for the National Preservation Institute in such topics as *Cultural Resources and NEPA* and *Scoping*.
- Developed and implemented training for Advisory Council on Historic Preservation and for the National Park Service.
- Planned and managed scoping and public meetings for environmental process for numerous Federal projects.

CURRICULUM VITAE

CYNTHIA L. PFANSTIEHL

Title	Archeologist, Principal Investigator
Expertise	Cultural Resources Management Mid-Atlantic Historic and Prehistoric Archeology Historic and Archival Research
Academic Background	M.A. Anthropology, George Washington University, 1985 B.A. Butler University, 1979
Experience	Ms. Pfanstiehl has eleven years of experience as an archeologist focusing on the Mid-Atlantic region. She has worked on investigations in both urban and rural settings. Her responsibilities include project management, all phases of prehistoric and historic field excavation, report and proposal preparation, architectural history and archival research. She also has experience working on environmental assessments. Her Dames & Moore project experience includes: • Fort Belvoir, Virginia - Phase III Data Recovery at Castle Club Park, Site 44FX1328. Data Recovery of a multi-component site; eighteenth century residence and prehistoric base camp, ranging from Early Archaic through Late Woodland period. • Charles County, Maryland - Phase III Data Recovery at the Philips Meadow Site 18CH1654. Data recovery of a Late Archaic site near Mattowoman Creek. Principal Investigator. • Alexandria, Virginia - Carlyle Square Archeological Project. Phase I identification, Phase II evaluation, and Phase III data recovery of the Virginia Glass Company, a late nineteenth through early twentieth-century bottle glass factory. • Cumberland, Kentucky - U.S. Army Corps of Engineers, Archeological survey and architectural history investigations for the Nashville District, Army Corps of Engineers Flood Protection project. The architectural component entailed the survey of 172 residential and commercial structures and seven bridges. The archeological survey concentrated on the floodplains of the Poor Fork and Looney Creeks in Cumberland, Kentucky. • Cherry Hill, Virginia - Phase I archeological survey of a 1,838-acre parcel of land. The Phase I survey identified forty-three sites requiring additional investigation. Sites included Early and Late Archaic foray sites, Middle and Late Woodland base camps, eighteenth- and nineteenth-century domestic sites, Civil War features, and a nineteenth-century industrial site. Phase II excavation of one mid-eighteenth century domestic structure, one late eighteenth century domestic structure, four mid-late nineteenth century domestic sites and four middle to late archaic sites. • Alexandria, Virginia - Lee Street archeological project, Phase II-III investigations of a Civil War Mess Hall, an eighteenth century wharf and tavern, a nineteenth-century bakery and townhouses. • Columbia, South Carolina - Phase I archeological investigations of proposed site of the Columbia Health Care/HCA Parking Lot.

Other Projects:

- Frederick County, Maryland - Phase II archeological investigations at the Shriner Site, early nineteenth century mill, lime quarry and residence.
- Emmitsburg, Maryland - Phase I and II archeological investigations at the National Emergency Training Center, eighteenth century religious academy and convent founded by Elizabeth Ann Seton.
- Phase I and II archeological investigations at Belmont Center, Woodbridge, Virginia. Sites included two Middle/Late Woodland prehistoric base camps and a nineteenth century residence. Principal Investigator and Field Director.
- Phase I and II archeological testing at 12th and W Streets N.E. Washington, D.C. Early nineteenth century rowhouses in downtown Washington D.C. Project Manager, Joint Field Director.
- Phase I archeological investigations at the Ben Lomond House, Kitchen Yard Area, Manassas, Virginia. Eighteenth and nineteenth century standing residence used as a hospital during the Civil War. Field Director.
- Phase I archeological investigations at the Computer Facility Site, Bureau of Census, Bowie, Maryland. Phase I investigations of the yards of the early nineteenth century Melford Plantation House. Field Director.
- Alexandria Business Center, Phase I excavations at historic railroad yard, mid to late eighteenth-century site located in Alexandria, Virginia. (Client: CSX). Field Director.
- Phase I and II archeological investigations at Russet Center, Anne Arundel County, Maryland. Prehistoric sites Early Archaic through Late Woodland. Crew Chief.
- Phase I archeological survey of the Horsey Tract, Seaford, Delaware. Prehistoric sites. Crew chief.
- Riversdale Mansion. Phase II excavations of the interior and yard areas of an early nineteenth-century historic mansion, Prince George's County, Maryland. Field and laboratory technician.
- Phase II archeological investigations of the Great Neck Road Site in Kent Island, Queen Anne's County, Maryland. (Client: Maryland State Highway Administration). Site of an early nineteenth-century homestead. Field Director.
- Phase III Excavations at Correctional Treatment Facility, Washington, D.C. Tasks included archaeological investigation of a Late Woodland prehistoric hamlet site near the Anacostia River. Field and laboratory technician.
- Phase I investigations at McNair Farms. Late Archaic prehistoric site in Fairfax County, Virginia. Field and laboratory technician.
- Phase I investigations of Chestnut Hill. Late Woodland prehistoric site in Baltimore County, Maryland. Field technician.
- Phase I investigations at Martin State Airport, Maryland. Prehistoric and historic sites. Crew Chief.

CYNTHIA L. PFANSTIEHL, page 3

- Rosenstock Site, Archeological Society of Maryland, 1990 field season. Prehistoric Woodland period palisaded village on the Monocacy River, Frederick County, Maryland.
- Phase I investigations at Greenspring, Anne Arundel County, Maryland. Prehistoric sites on the Magothy River. Field and laboratory technician.

Archival History Projects

- Camden Yards Resources Management Plan. Conducted archival research and prepared a historical background for proposed site of the new Camden Yards Stadium in Baltimore, Md.
- Preliminary Historic and Cultural Resources Review of the Proposed Museum of Health and Medicine, Washington D.C. Conducted archival research, a historical background and a predictive model for locating archeological sites for the proposed project area of the New Museum of Health and Medicine.
- Preliminary Archeological Overview and Assessment of South River Colony, Anne Arundel County, Md. Conducted archival research, a historical background and a predictive model for the proposed project area of the South River Colony Residential Development near the South River in Anne Arundel County, Md.
- Cultural Resources Management Plan for the National Emergency Training Center in Emmitsburg, Maryland. Developed a CRMP using historic maps, archival records, architectural and engineering records for the management of the architectural and archeological resources associated with the historic St. Joseph's Academy.
- Fort A.P. Hill, Artillery Range Archival Study. Conducted archival research to provide a history of artillery range activities at the A.P. Hill Military Reservation in Bowling Green, Virginia, from 1941 to the present.
- Taft Bridge Lions Project. Conducted research of archival documents, letters, and drawings pertaining to the creation and restoration of the Lions sculptures, to contribute to a history on the sculptor (Ralph Hinton Perry) and the Lion sculptures.

Professional History

Principal Investigator, Dames & Moore, Bethesda, Maryland (1997-present)
Senior Archeologist, Kemron Environmental Services, McLean, Virginia (1992 - 1995)
Supervising Archeologist, Parsons Engineering Science, Washington, DC, (1988 - 1990)

Selected Publications

Fort A.P. Hill Artillery Range Archival Study. Cynthia Pfanstiehl. Report on File at Dames & Moore, Bethesda, Maryland (1998).

Preliminary Archaeological Overview and Assessment, South River Colony, Anne Arundel County, Maryland. Co-authored with Keith Barr. Report on file at Engineering Science,

CURRICULUM VITAE

HEATHER CROWL

Title	Archeologist
Expertise	Cultural Resources Management Mid-Atlantic Historical Archeology
Academic Background	M.A., Anthropology, American University, expected 1999 B.A., Anthropology, Fine Arts, College of William and Mary, 1994, Magna Cum Laude
Experience	Ms. Crowl's responsibilities include archeological field excavation, historic architecture documentation, artifact analysis, cataloging, report and proposal preparation, and archival research. Ms. Crowl has experience in all phases of archeological investigations including reconnaissance, testing, and mitigation. She has participated in various phases of numerous cultural resources projects and environmental assessments, including: • Fort Amsterdam, Phase I archeological survey of a peninsula on Sint Maarten, Netherlands Antilles, that includes a fort built by the Dutch in 1630 and then rebuilt by the Spanish in the seventeenth century, and occupied by the English in the eighteenth century. Conducted for Divi Resorts, Sint Maarten to identify the mechanisms for developing the property in a manner that enhances its historic value. • Castle Club, Phase III archeological excavation of a mid-eighteenth-century tenant farm and Late Archaic to Early Woodland prehistoric site, conducted for the U.S. Army, Fort Belvoir, Fairfax County, Virginia. • Chapline Place Phase III archeological excavation of an eighteenth-century tenant farm or slave quarters, conducted for Osprey Development Corporation, Prince Frederick, Calvert County, Maryland. • Cherry Hill Phase II archeological excavation of an early-eighteenth century domestic site, two late-eighteenth to early-nineteenth century domestic sites, two late-nineteenth century domestic sites, a mid-nineteenth-century domestic and industrial site, and five prehistoric sites. Conducted for Legend Properties, Prince William County, Virginia. • Cherry Hill Phase I archeological survey of a 1,838-acre parcel of land for Legend properties. Phase I survey identified forty-three sites requiring additional investigation. Sites included Early and Late Archaic base camps, Woodland base camps, lithic scatters, eighteenth and nineteenth-century domestic sites, and a nineteenth-century industrial site. Prince William County, Virginia. • U.S. Army Corps of Engineers, Phase I archeological and architectural history investigation of a flood protection project Area of Potential Effect in Cumberland, Harlan County, Kentucky; and an architectural history investigation of 300 structures within a flood protection Area of Potential Effect around the city of Harlan, Harlan County, Kentucky. • Historic documentation of the Taft Bridge lions sculpted by Roland Hinton Perry, conducted for Professional Restoration, Inc., Washington, District of Columbia.

- OH-17, archeological survey of a 36-acre parcel of land for a private power company, Wood County, Ohio.
- Carlyle Development. Phase I identification, Phase II evaluation, and Phase III excavation of the Virginia Glass Co., a late nineteenth through early twentieth century glass factory, Alexandria, Virginia.
- Industrial architectural study and thematic multiple property National Register Nomination of historic iron furnaces on the George Washington and Jefferson National Forests, VA.
- Rocks Engineering. Phase II archeological investigations of the Charles and Frank Harris House Sites, and Historic West Ox Road, Fairfax County, Virginia.
- Lee Street Venture Project. Phase II, and Phase III excavation of historic site that included pre-Civil War residential duplex, tavern, and brick bakery, and Civil War barracks, office, stable and privy, Alexandria, Virginia.
- Phase I archeological investigations of proposed site of the Columbia Healthcare/HCA Parking Lot, Columbia, South Carolina.
- Winchester Homes, Inc., Phase I Archeological Investigations of planned Patuxent Pointe housing development, and Phase II excavation of an early nineteenth century farmstead site, Anne Arundel County, Maryland.
- Smithsonian Institution, Cultural Resource Overview, Phase I Archeological Investigations and Phase II Archeological Evaluation of late-eighteenth/late-nineteenth century domestic tenant farm site for proposed National Air and Space Museum Dulles Center, Fairfax County, Virginia.
- Northampton County architectural reconnaissance and intensive-level survey, preparation of historical context, and National Register of Historic Places nominations for both individual properties and historic districts in Northampton County, Virginia.
- Charles County Department of Public Works, Phase I archeology and architectural history Investigation for Inter-County Connector Construction Project, Charles County, Maryland.
- St. Clement's Island Shell Midden, Site 18ST686, Phase II archeological evaluation, St. Mary's County, Maryland.
- Mason County Development Authority, Cultural Resources Due Diligence Investigation, Phases I and II Archeological Investigations for a planned industrial park, Point Pleasant, West Virginia.
- Cardington-Galion and Pawnee Transmission Lines, Phase I Cultural Resources investigations, Morrow, Geauga, and Lake Counties, Ohio.
- Midway Transmission Substation Expansion, Phase I Cultural Resources investigations, Henry County, Ohio.
- Aberdeen Proving Ground (APG), Phase I Archeological Investigations of U.S. Army Installation Restoration sites at Graces Quarters and Carroll Island areas of APG in Baltimore County, Maryland.

HEATHER K. CROWL, page 3

- Dover Air Force Base archeological assessment, map-based evaluation of archeological potential for Installation Restoration Program Sites, and Community Response Plan, Kent County, Delaware.
- Fort Belvoir, Environmental Assessments for Dogue Creek sewer replacement and Officers' Club renovation, Fairfax County, Virginia.
- Wackenhut Corrections Corporation and the Immigration and Naturalization Service, Environmental Assessment for new detention facilities, Jamaica, New York and Winton, Hertford County, North Carolina.
- United States Postal Service (USPS), Environmental Assessment for new Post Office facility in Lowell, Massachusetts.
- Phase I archeological investigations of proposed site of the North Gate Visitor Pass Office, and at proposed site of new naval air exchange facility, Patuxent River Naval Air Station, St. Mary's County, Maryland.
- Federal Bureau of Investigation, Phase I Archeological Investigation of proposed site of FBI Laboratory, Quantico, Stafford County, Virginia.
- Federal Aviation Administration, Phase I Archeological Investigation for runway improvements at Baltimore/Washington International Airport, Anne Arundel County, Maryland.

Projects conducted for Parson's Engineering Science:

- DC MCI Arena Project, Phase III excavation of a nineteenth-century city block of Washington D.C.
- Balmoral Tract Phase I Survey and Phase II Excavation of Civil War and other nineteenth-century sites for a private housing developer, Centerville, Virginia.
- Delaware Department of Transportation, Lums Pond Phase III excavation of prehistoric site (Archaic through Late Woodland), Newark, Delaware.
- Department of Transportation, Barney Circle Phase III excavation of prehistoric site, Washington, D.C.

Participated in William and Mary's archeological excavation of an eighteenth-century British colonial domestic site and a nineteenth-century British fort in Bermuda.

Senior research included a distribution study of eighteenth and nineteenth-century ceramics from the plowzone of site 44MX28, and of artifacts from a shovel test survey of the adjacent area. Created contour maps illustrating distribution concentrations using Surfer software, Middlesex County, Virginia.

Professional History

Archeologist, Dames & Moore, Bethesda, Maryland (1995-present)
Field Technician, Parson's Engineering Science, Fairfax, Virginia (Sept. 1994 - Oct. 1995)
Temporary Employee, Temps. & Co., Reston, Virginia (June 1994 - May 1995)
Study Abroad at Beijing Normal University, Beijing, China (Summer 1993)
Field School in Historical Archeology, College of William and Mary (Summer 1992)

CURRICULUM VITAE

RACHEL STALLINGS GRANT

Title Project Administrator
Archeologist

Expertise Archeological Field Investigations and Reporting
Archeological Lab Analysis
Archival Research
Project Administration
National Environmental Policy Act Checklists
Data Base Development and Management

Academic Background B.A., Anthropology, Florida State University, 1991

Project Administration Ms. Grant's responsibilities include writing proposals, estimating proposal costs, tracking proposal progress, setting up jobs, maintaining project budgets, monitoring project timelines, ensuring deadlines are met, and purging the files of completed projects for archival storage. In addition, Ms. Grant has developed a project database that includes project descriptions for 255 forms, resumes of key personnel, and a bibliography of reports for the Cultural Resources Group at the Washington, D.C. Dames & Moore office. Ms. Grant is highly skilled with numerous computer programs, including: Microsoft Word, Excel, Power Point, and Access, as well as CorelDraw!, and Word Perfect.

National Environmental Policy Act

Cellular Projects

Ms. Grant has worked extensively on developing checklists and protocols for responding to Federal Communications Commission Regulations at 47 CFR § 1.1307, in which the FCC requires that modifications to, or new construction of, cellular antennas address the issues outlined in NEPA. To streamline the process for multiple projects, Ms. Grant developed a project database to track and produce project deliverables. In addition to overseeing the work of others, Ms. Grant conducts site visits, completes archival research, creates graphics, writes reports, and produces and formats the project reports.

Selected Dames & Moore NEPA projects:

- Cellular One NEPA checklists, completed for cellular tower, monopole, and rooftop antenna locations in Virginia, Maryland, and the District of Columbia.
- AT&T Wireless NEPA checklists, completed for cellular tower, monopole, and rooftop antenna locations in Virginia, Maryland, and the District of Columbia.
- American Tower NEPA checklists, completed for new cellular tower projects in Pennsylvania.

Environmental Assessments

Ms. Grant coordinates with Dames & Moore employees, contractors, and clients to gather the information necessary to complete environmental assessments. Ms. Grant's responsibilities

RACHEL GRANT, page 2

include producing the final report, incorporating graphics, obtaining all appendices and arranging for public notification via legal advertisements in local newspapers.

Archeology/Historic Preservation

Ms. Grant's responsibilities include field survey and excavation, artifact analysis, cataloguing, report preparation, graphic preparation, and archival research. Ms. Grant has experience in all phases of archeological investigations including reconnaissance, testing, and mitigation. She has participated in various phases of numerous cultural resources projects.

Selected Dames & Moore archeological/historical projects:

- Fort Amsterdam, Phase I archeological survey of a peninsula on Sint Maarten, Netherlands Antilles, that includes a fort built by the Dutch in 1630 and then rebuilt by the Spanish in the seventeenth century, and occupied by the English in the eighteenth century. This project was conducted for Divi Resorts, Sint Maarten to identify the mechanisms for developing the property in a manner that enhances its historic value.
- Philip's Meadow, a Phase III Data Recovery conducted on a lithic scatter site in Charles County, Maryland, for the Rainbow Construction Company.
- Wood River, a preliminary assessment of archeological potential for a parcel of land in Wood River, Illinois, upon which Houston Industries proposed to build a power facility.
- Carlyle Square Block D Development, a Phase I identification, Phase II evaluation, and Phase III excavation of the Virginia Glass Co., a late nineteenth through early twentieth century glass factory, Alexandria, Virginia, conducted for the Carlyle Development Company.
- Cumberland, Kentucky, a Phase I archeological and architectural history investigation of a flood protection project Area of Potential Effect, Cumberland, Harlan County, Kentucky, completed for the U.S. Army Corps of Engineers.
- Phase I archeological investigations of proposed site of the Columbia Healthcare/HCA Parking Lot, Columbia, South Carolina.
- Cherry Hill, Phase I archeological survey of a 1,733-acre parcel of land for a private developer, Legend Properties. Phase I survey identified forty-three sites requiring

RACHEL GRANT, page 3

additional investigation. Sites included Early and Late Archaic base camps, Woodland base camps, lithic scatters, eighteenth and nineteenth-century domestic sites, Civil War features, and a nineteenth-century industrial site.

Selected projects for BOAS Inc., Seattle, Washington:

- Crew Chief / Historical Researcher / Graphic Artist / Site Form Compiler and Editor / Contributing Author, Vancouver Lowlands Mitigation Wildlife Area, Clark County, Washington. A survey for the development of a management plan for the Washington State Department of Fish and Wildlife.
