

2019 Proposed Ground Level Parks and Open Space

2019 Draft Plan Recommendations

- Provide 26 acres of at-grade publicly accessible open space as generally depicted in the 2019 required ground level public open space map. Open spaces throughout the network will include a mixture of active, passive, natural, , educational, entertainment and social elements for all ages and abilities.
- Each block will be responsible for the design and construction of the required publicly accessible open space as generally depicted in the 2019 required ground level public open space map
- In addition to the required publicly accessible open space specified in Recommendation #1, each block developed exclusively with a residential use will provide a minimum 25% at- or above-grade open space.
- Consider interim recreational and entertainment uses on the existing surface parking lots (if not otherwise used as parking) to the extent feasible
- One story accessory park structures with supporting uses may be provided if consistent with the intent of the open space and the Plan.

2003 Ground level Public Open Space	18 ac
Proposed Additional Ground Level Open Space	+ 8 ac
Total Ground Level Public Open Space	26 ac
Private and rooftop = Additional Open Space	

Community Open House #4
