

Duke Street Tunnel Public Art Project

Mike McConnell's Concept Proposal
Approved by the Alexandria Commission for the Arts on
November 15, 2017

Public Art Goal

- **Goal:** Activate space by making tunnel enjoyable, interesting, pleasing, and fun.
- This public art will achieve this through the use of bright colors and large contrasting forms that suggest nature and movement. Artwork will pursue pedestrians to pause and explore so they can visually weave through it and find something unexpected.

Project Description

- Twelve (12) panels printed on textured vinyl mounted on 1/4" PVC.
- Bright colored and large contrasting to adapt to the levels of light inside the tunnel.
- Panels mounted directly on the brick with a tape product made for this application
- Will leave about a ½-inch space around the edges.
- Few maintenance requirements except some wiping them off with water if dirt accumulates.
