### **Overview of the Methodology**

Leisure Vision conducted a Parks and Recreation Needs Assessment Survey between August and September of 2013 to help establish usage and satisfaction for current parks and facilities and to determine priorities for the future development of parks and recreation facilities, programs and services within the City of Alexandria Parks and Recreation Department. The survey was designed to obtain statistically valid results from households throughout the City of Alexandria. The survey was administered by mail and by phone.

Leisure Vision worked extensively with City of Alexandria officials in the development of the survey questionnaire. This work allowed the survey to be tailored to issues of strategic importance to effectively plan the future system.

A five-page survey was mailed to a random sample of 5000 households within the City of Alexandria Parks and Recreation boundaries. Approximately three days after the surveys were mailed each household that received a survey also received an automated voice message encouraging them to complete the survey. In addition, about two weeks after the surveys were mailed Leisure Vision began contacting households by phone. Those who had indicated they had not returned the survey were given the option of completing it by phone.

The goal was to obtain a total of at least 600 completed surveys. ETC/Leisure Vision went above and beyond that goal to reach a total of 850 surveys completed. The results of the random sample of 850 households have a 95% level of confidence with a precision rate of at least +/-3.3%. The return rate was 17%.

The following pages summarize major survey findings.

- ❖ **Have Respondent Households Visited any City of Alexandria Parks During the Past 12 months? How Would Respondents Rate the Physical Condition of Those Parks Visited?** Eighty-two percent (82%) of respondents visited the City of Alexandria Parks within the past 12 months. This is higher than the national benchmark of (78%). Of those (82%) of respondents who visited the parks, (23%) of respondents rated the parks as being in “excellent” condition. Other ratings include: Sixty-one percent (61%) “good,” 15% “fair,” and only (1%) rated the condition of the parks as “poor.”
- ❖ **Have Respondent Households Participated in Recreation or Cultural Programs or Special Events Offered by the City of Alexandria Parks and Recreation Department During the Past 12 Months?** Forty-eight percent (48%) of respondents said that they have participated in the City of Alexandria programs or activities within the past 12 months. ## National Benchmarking

*Since 1998, Leisure Vision (a division of ETC Institute) has conducted household surveys for needs assessments, feasibility studies, customer satisfaction, fees and charges comparisons, and other parks and recreation issues in more than 700 communities in over 45 states across the country.*

The results of these surveys has provided an unparalleled data base of information to compare responses from household residents in client communities to “National Averages” and therefore provide a unique tool to “assist organizations in better decision making.”

Communities within the data base include a full-range of municipal and county governments from 20,000 in population through over 1 million in population. They include communities in warm weather climates and cold weather climates, mature communities and some of the fastest growing cities and counties in the country.

*“National Averages” have been developed for numerous strategically important parks and recreation planning and management issues* including: customer satisfaction and usage of parks and programs; methods for receiving marketing information; reasons that prevent members of households from using parks and recreation facilities more often; priority recreation programs, parks, facilities and trails to improve or develop; priority programming spaces to have in planned community centers and aquatic facilities; potential attendance for planned indoor community centers and outdoor aquatic centers; etc.

*To keep the benchmarking data base current with changing trends,* Leisure Vision’s benchmarking data base is updated on an annual basis and we only use citizen survey results going back a maximum of five years in our current benchmarking averages.

*Results from household responses for the City of Alexandria were compared to National Benchmarks as well as the results from the 2011 City of Alexandria Parks and Recreation survey to gain further strategic information.* A summary of all tabular comparisons are shown on pages 2-8.

## *City of Alexandria: Weighted Data*

### **Methodology**

The process of **weighting** involves emphasizing the contribution of some aspects of a set of data to a final effect or result, giving them more weight in the analysis. That is, rather than each variable in the data contributing equally to the final result, some data are adjusted to contribute more than others. ETC Institute used weighting for allowance or adjustment of the race and ethnicity demographic data in order to take account of the specific demographics from the US census data in a the City of Alexandria.

The following is a table shows the percentage of respondents in Alexandria based on the (1) US Census, (2) Un-weighted Data and (3) Weighted Data.

	2010 US Census	Non-weighted Data	Weighted Data
